FOREWORD

Welcome to the 6th International Joint Conference on Natural Language Processing (IJCNLP) in Nagoya, Japan. IJCNLP was initiated in 2004 by The Asian Federation of Natural Language Processing (AFNLP) with the major goal to provide a platform for researchers and professionals from around the world to share their experiences related to natural language processing and computational linguistics. In the past years, IJCNLPs were held in 5 different places: Hainan Island (2004), Jeju Island (2005), Hyderabad (2008), Singapore (2009), and Chiang Mai (2011). This year the 6th IJCNLP is held in Nagoya Congress Center on October 14-18, 2013. The conference covers a broad spectrum of technical areas related to natural language and computation. Besides main conference, the program includes 2 keynote speeches, 3 tutorials, 12 demonstrations, and 7 workshops.

We would like to thank many people who contribute their efforts to IJCNLP 2013. Program chairs Ruslan Mitkov and Jong C. Park select a strong set of papers and organize a wonderful program. PC coordinators Jin-Woo Chung and Isabel Duran support authors and PC committee a stable submission and review platform. Workshop chairs Naoaki Okazaki and Scott Wen-tau Yih organize 7 nice pre-conference and post-conference workshops. Tutorial chairs Vincent Ng and Satoshi Sekine choose 3 very good tutorials. Demo chairs Hang Li and Kentaro Torisawa recommend 12 demonstrations. Sponsorship chair Hiromi Nakaiwa designs sponsor packages and finds financial supports. We thank all the sponsors. Publicity chairs Gareth Jones, Gary Geunbae Lee, Diego Mollá-Aliod, Chengqing Zong and Stajner Sanja help circulate the conference information and promote the conference. We would like to express our special thanks to publication chairs Jing Jiang and Lun-Wei Ku. They bore two babies during the organization of the conference. After the hard work, they deliver an excellent proceeding to the participants. Finally, we are very thankful to those people who dedicate their time and energy to IJCNLP 2013, but are not mentioned in the above. Without them, we would not have had a successful conference.

PREFACE

As the flagship conference of the Asian Federation of Natural Language Processing (AFNLP), IJCNLP continues to establish itself as a highly influential international event. IJCNLP 2013 covers a broad spectrum of technical areas related to Natural Language Processing. The conference includes regular papers, short papers, poster papers, and system demonstrations, as well as pre- and post-conference tutorials and workshops.

This year, we received 363 paper submissions, which is not as many as the record submissions in the previous conference (e.g., 478 in 2011) but still quite admirable, considering the tough competition for good papers this year, with EMNLP 2013 and RANLP 2013, and the fact that many organizations have restricted their spending in the current economic climate. This represents increasing interest in research on NLP and the growing reputation of IJCNLP as an international event. The 363 submissions include 235 regular, 86 short, and 42 poster paper submissions from more than 37 countries. In particular, approximately 63% of the papers are from 14 countries and areas in Asia Pacific, 18% from 14 countries in Europe, 14% from the United States and Canada; in addition, 4% of the papers are from the Middle East and Africa, and 1% come from South America.

We would like to thank all the authors for submitting papers to IJCNLP 2013. The significant increase in the number of submissions, the topics covered and the wide range of demographic areas represent a rapid and steady growth of our field and hold promise for a bright future. We would also like to thank the 23 area chairs and 439 program committee members for writing over 1078 reviews and meta-reviews and for paving the way for the final paper selection. Of all 363 submissions, a total of 88 papers were accepted as regular papers, representing a healthy 24.4% acceptance rate. Additional 56 papers were accepted as short papers, which, together with regular papers, represent a 39.8% acceptance rate. In addition, 74 papers were accepted as poster papers. Due to various reasons, some authors of accepted papers chose to withdraw their submissions afterwards. As a result, we have 85 regular papers (23.4% acceptance rate), 53 short papers (38.0% acceptance rate), and 62 poster papers. All the regular and short papers are presented orally, and all the poster papers are presented in the plenary poster session. We are extremely grateful to the area chairs and program committee members for all their hard work, without which the preparation of this program would not have been possible. The help of PC coordinators is also much appreciated.

We are delighted to have two keynote speakers addressing different aspects of NLP in IJCNLP 2013. Hwee Tou Ng will present a talk about improving students' writing with automated grammatical error correction, including the review of recent research and advances in grammatical error correction. Roberto Navigli will present a talk about BabelNet 2.0, a very large multilingual semantic network that covers 50 languages and provides both lexicographic and encyclopedic knowledge for all the open-class parts of speech. These plenary talks will surely be not only informative but also enlightening to the audience, leading to many innovative research ideas. We would like to thank General Chair Hsin-Hsi Chen, the Local Arrangements Committee headed by Hitoshi Isahara, and the AFNLP Conference Coordination Committee chaired by Yuji Matsumoto, for their help and advice. Thanks to Jing Jiang and Lun-Wei Ku, the Publication Committee Chairs, for putting the proceedings together, and all the other committee chairs for their great work.

We hope that you enjoy the conference!
