

Semantic Reconstruction

Semantic reconstruction involves rephrasing a given text while preserving its original meaning. In this context, you are presented with a riddle. The task is to rephrase the riddle without altering the correct answer. Perform a semantic reconstruction of the following riddle.
...

Context Reconstruction

Context reconstruction involves maintaining the original reasoning path while changing both the question and the answer to describe a new situational context. In this context, you are presented with a riddle. The task is to reconstruct the context of the riddle while keeping the original reasoning intact. Ensure that the reconstructed context maintains the same
