## Preface

Although there exists a considerable body of CL research specifically targeted to Semitic languages, much of the work to date has been the result of initiatives undertaken by individual researchers or research establishments. A direct consequence is that there is comparatively little awareness amongst practitioners of either the state of the art as practiced outside their own locality, the common challenges faced by all practitioners, or the potential for developing a coordinated approach. The aims of this workshop are therefore:

- To provide a forum where current work in a broad range of subfields can be presented, collected and diffused.
- To assess the state of the art with a view to identifying promising areas for future collaborative research.
- To examine the possibilities of supporting such research through national and international funding initiatives.

After refereeing, submitted papers, which concern Arabic, Hebrew, Maltese and Akkadian, were classified, rather coarsely, into the following subject areas: tagging Arabic text, orthography, morphology, syntax/parsing/generation. The workshop programme comprises a session for each of these themes, together with a short supplementary session for short papers. As can be seen from the programme, there will be ample time for discussion.

I am greatly indebted to colleagues in the programme committee, who also doubled as referees, for their help, patience and comments, all of which have contributed towards what promises to be a fruitful and stimulating exchange of views.

Michael Rosner  
University of Malta  
June 1998

### PROGRAMME COMMITTEE MEMBERS:

Michael Rosner, University of Malta, Malta (Workshop Coordinator)  
Ken Beesley, Xerox Research Centre Europe, France  
Joe Caruana, University of Malta, Malta  
Yaacov Choueka, Bar Ilan University, Israel  
Khalid Choukri, ELRA/ELDA, France  
Fathi Debili, CNRS-CELLMA (Paris) / IRMC, Tunisia  
Ray Fabri, University of Malta, Malta  
Mamoun Hattab, Arabic Textware, Amman, Jordan  
George Kiraz, Bell Labs, USA  
Chadia Moghrabi, University of Moncton, Canada  
Mori Rimon, Hebrew University, Israel

### SPONSOR:

Mid-Med Bank, Malta

## Programme

08:55–09:00 Welcome – Michael Rosner

### Session 1: Tagging

09:00–09:30 Saleem Abuleil and Martha Evens (Illinois Institute of Technology, USA) *Discovering Lexical Information by Tagging Arabic Newspaper Text*

09:30–10:00 John Maloney and Michael Niv (SRA International Corp, USA) *TAGARAB: A Fast, Accurate Arabic Name Recogniser Using High Precision Morphological Analysis*

10:00–10:30 Fathi Debili and Emna Souissi (CNRS-CELLMA/IRMC, Tunisia) *Etiquetage grammatical de l'arabe voyellé ou non*

10:30–10:40 Discussion

10:40–11:00 Coffee Break

### Session 2: Orthography

11:00–11:30 Michel Fanton (CERTAL/INALCO, France) *Finite State Automata and Arabic Writing*

11:30–12:00 Bonnie Glover Stalls and Kevin Knight (ISI, University of Southern California, USA) *Translating Names and Technical Terms in Arabic Text*

12:00–12:30 Fathi Debili and Hadhemi Achour, (CNRS-CELLMA/IRMC, Tunisia) *Voyellation automatique de l'arabe*

12:30–12:40 Discussion

12:40–13:30 Lunch Break

### Session 3: Morphology

13:30–14:00 Kenneth R. Beesley (Xerox Research Centre Europe, France) *Arabic Morphology using only Finite-State Operations*

14:00–14:30 Martine Smets (University of Sussex, UK) *Paradigmatic Treatment of Arabic Morphology*

14:30–15:00 Riyadh Al-Shalabi and Martha Evens (Illinois Institute of Technology, USA) *A Computational Morphology System for Arabic*

15:00–15:30 François Barthélemy (Galatasaray University, Turkey and CNAM, France) *A Morphological Analyser for Akkadian Verbal Forms with a Model of Phonetic Transformations*

15:30–15:40 Discussion

15:40–16:00 Coffee Break

### Session 4: Syntax, Parsing and Generation

16:00–16:30 Shuly Wintner (University of Tübingen, Germany) *Towards a Linguistically Motivated Computational Grammar for Hebrew*

16:30–17:00 Yael Dahan Netzer and Michael Elhadad (Ben Gurion University, Israel) *Generating Determiners and Quantifiers in Hebrew*

17:00–17:10 Discussion

### Session 5: Short Papers

17:10–17:20 Michael Rosner, Joe Caruana and Ray Fabri (University of Malta) *Maltilex: A Computational Lexicon for Maltese*

17:20–17:30 Paul Micallef (University of Malta) *Rule-Based Lexical Analysis of Maltese*

17:30–17:40 Ali M. Obaid (Technical University of Budapest, Hungary) *A New Pattern-Matching Approach to the Recognition of Printed Arabic*

17:40–18:00 Discussion/Closing Session

## Table of Contents

Preface . . . . .	i
Programme . . . . .	ii
