

Responsible NLP Checklist

Paper title: *Self-Adjust Softmax*

Authors: *Chuangyang Zheng, Yihang Gao, Guoxuan Chen, Han Shi, Jing Xiong, Xiaozhe Ren, Chao Huang, Zhenguo Li, Yu Li*

How to read the checklist symbols:

- the authors responded 'yes'
- the authors responded 'no'
- the authors indicated that the question does not apply to their work
- the authors did not respond to the checkbox question

For background on the checklist and guidance provided to the authors, see the [Responsible NLP Checklist](#) page at ACL Rolling Review.

A. Questions mandatory for all submissions.

- A1. Did you describe the limitations of your work?

This paper has a Limitations section.

- A2. Did you discuss any potential risks of your work?

We discuss the Limitation in Section Limitation in Appendix. And we discuss the Risk in Section Risk in Appendix

B. Did you use or create scientific artifacts? (e.g. code, datasets, models)

- B1. Did you cite the creators of artifacts you used?

We cite and discuss the Pytorch in Appendix Implementation

- B2. Did you discuss the license or terms for use and/or distribution of any artifacts?

We discuss the term for the use in Appendix Implementation

- B3. Did you discuss if your use of existing artifact(s) was consistent with their intended use, provided that it was specified? For the artifacts you create, do you specify intended use and whether that is compatible with the original access conditions (in particular, derivatives of data accessed for research purposes should not be used outside of research contexts)?

We discuss it in Appendix Implementation

- B4. Did you discuss the steps taken to check whether the data that was collected/used contains any information that names or uniquely identifies individual people or offensive content, and the steps taken to protect/anonymize it?

The data is used from public datasets.

- B5. Did you provide documentation of the artifacts, e.g., coverage of domains, languages, and linguistic phenomena, demographic groups represented, etc.?

The Pytorch has the document

- B6. Did you report relevant statistics like the number of examples, details of train/test/dev splits, etc. for the data that you used/created?

We have discuss the data in Section Model configuration in Appendix

The Responsible NLP Checklist used at ACL Rolling Review is adopted from NAACL 2022, with the addition of ACL 2023 question on AI writing assistance and further refinements based on ARR practice.

C. Did you run computational experiments?

- C1. Did you report the number of parameters in the models used, the total computational budget (e.g., GPU hours), and computing infrastructure used?

We have the experiment parts. And we have presented the model size and budget in Section Model configuration in Appendix

- C2. Did you discuss the experimental setup, including hyperparameter search and best-found hyperparameter values?

We have presented in Section Model configuration in Appendix

- C3. Did you report descriptive statistics about your results (e.g., error bars around results, summary statistics from sets of experiments), and is it transparent whether you are reporting the max, mean, etc. or just a single run?

We have present the error bar in Section Error Bars in Appendix

- C4. If you used existing packages (e.g., for preprocessing, for normalization, or for evaluation, such as NLTK, SpaCy, ROUGE, etc.), did you report the implementation, model, and parameter settings used?

We have present the paramters in Section Model configuration in Appendix

D. Did you use human annotators (e.g., crowdworkers) or research with human subjects?

- D1. Did you report the full text of instructions given to participants, including e.g., screenshots, disclaimers of any risks to participants or annotators, etc.?

We do not have human subjects

- D2. Did you report information about how you recruited (e.g., crowdsourcing platform, students) and paid participants, and discuss if such payment is adequate given the participants' demographic (e.g., country of residence)?

We do not have recuritment

- D3. Did you discuss whether and how consent was obtained from people whose data you're using/curating (e.g., did your instructions explain how the data would be used)?

The data comes from public dataset

- D4. Was the data collection protocol approved (or determined exempt) by an ethics review board?

The work do not need ethic review

- D5. Did you report the basic demographic and geographic characteristics of the annotator population that is the source of the data?

We do not have annotators

E. Did you use AI assistants (e.g., ChatGPT, Copilot) in your research, coding, or writing?

- E1. If you used AI assistants, did you include information about their use?

We discuss it in Section Risk in Appendix
