Erratum

In the article *Practical Experiments with Regular Approximation of Context-Free Languages* by Mark-Jan Nederhof that appeared in *Computational Linguistics* 26(1), the equation on page 19 that reads

$$\exists i[A \in N_i \wedge B \in N_i] \ - \ \exists \alpha_1, \beta_1, \alpha_2, \beta_2[A \rightarrow^* \alpha_1 B \beta_1 \wedge B \rightarrow^* \alpha_2 A \beta_2],$$

should read

$$\exists i[A \in N_i \wedge B \in N_i] \ \Leftrightarrow \ \exists \alpha_1, \beta_1, \alpha_2, \beta_2[A \rightarrow^* \alpha_1 B \beta_1 \wedge B \rightarrow^* \alpha_2 A \beta_2],$$

instead.
