

# THE ACL-MIT PRESS SERIES in NATURAL LANGUAGE PROCESSING

*Aravind K. Joshi, Karen Sparck Jones, Mark Y. Liberman,*  
*Editors*

The ACL Series will offer books of high quality in the field of natural language processing, including human and machine speech production and understanding. It will cover a wide range of topics, both theoretical and applied, which should interest researchers not only in computational linguistics, but also in formal linguistics.

The Series will include specially commissioned volumes, research monographs, textbooks, and on occasion, collections of high quality papers with clear unifying themes compiled under the editorship of distinguished researchers.

The MIT Press publishes the ACL journal, *Computational Linguistics*. The Press also has a strong list in formal linguistics and publishes the journal *Linguistic Inquiry*.

Submissions for the ACL Series should be directed to one of the Editors, or to Henry Bradford Stanton at The MIT Press

## **GENERATING REFERRING EXPRESSIONS**

Constructing Descriptions in a Domain of Objects and Processes

*Robert Dale*

Robert Dale presents a detailed description of the development of algorithms for the generation of referring expressions, and of the underlying structures that motivate these algorithms, in a dynamic domain. He provides a number of novel results in both knowledge representation and natural language generation that should have straightforward applications in other domains.

A Bradford Book 288 pp. 133 illus. \$37.50 (August)

## **FOUNDATIONAL ISSUES IN NATURAL LANGUAGE PROCESSING**

*edited by Peter Sells, Stuart M. Shieber, and Thomas Wasow*

William Rounds, Aravind Joshi, Janet Fodor, and Robert Berwick are leading scholars in the multidisciplinary field of natural language processing. In four separate essays they address the complex and difficult connections among grammatical theory, mathematical linguistics, and the operation of real natural-language-processing systems, both human and electronic. The editors' substantial introduction details the progress and problems involved in attempts to relate these four areas of research.

A Bradford Book \$32.50

## **CARTESIAN COMPUTATION**

Parsing with Principles and Parameters

*Sandiway Fong and Robert C. Berwick*

*foreword by Noam Chomsky*

*Cartesian Computation* shows for the first time how Noam Chomsky's principles-and-parameters approach to language can be turned into an efficient computer program for analyzing sentences from languages as different as English and Japanese.

350 pp. \$40.00 (August)

## **MORPHOLOGY AND COMPUTATION**

*Richard Sproat*

This book provides the first broad yet thorough coverage of issues in morphological theory.

A Bradford Book 336 pp., 39 illus. \$35.00

## **APPROACH TO SYNTAX**

Foundations, Specifications, and Implementations of Theories of Government and Binding

*Edward P. Stabler, Jr.*

Stabler shows how syntactic theories for natural languages can be handled without guesswork or oversimplification.

A Bradford Book 432 pp., 81 illus. \$40.00

## **COMPUTATIONAL MORPHOLOGY**

Practical Mechanisms for the English Lexicon

*Graeme D. Ritchie, Graham J. Russell, Alan W. Black, and Stephen G. Pulman*

*Computational Morphology* is the first book to present an integrated set of techniques for the rigorous description of morphological phenomena in English and similar languages.

304 pp. \$32.50

## **THE CORE LANGUAGE ENGINE**

*edited by Hiyan Alshawi*

Recent research results from different areas of computational linguistics are integrated into a single elegant design with potential for application to tasks ranging from machine translation to information system interfaces.

A Bradford Book 280 pp. \$37.50

## **COGNITIVE MODELS OF SPEECH PROCESSING**

Psycholinguistic & Computational Perspectives

*edited by Gerry T.M. Altmann*

*Cognitive Models of Speech Processing* presents extensive reviews of current thinking on psycholinguistic and computational topics in speech recognition and natural language processing, along with a substantial body of new experimental data and computational simulations.

A Bradford Book \$55.00

## **PLAN RECOGNITION IN NATURAL LANGUAGE DIALOGUE**

*Sandra Carberry*

In most current natural language systems each query is treated as an isolated request for information regardless of its context in dialogue. Sandra Carberry addresses the problem of creating computational strategies that can improve user-computer communication by assimilating ongoing dialogue and reasoning on the acquired knowledge.

A Bradford Book \$35.00

## **INTENTIONS IN COMMUNICATION**

*edited by Philip R. Cohen, Jerry Morgan, and Martha E. Pollack*

A Bradford Book \$45.00

## **SPEAKING**

From Intention to Articulation  
*Willem J.M. Levelt*

Willem "Pim" Levelt, Director of the Max Planck Institute for Psycholinguistics, covers the entire process of speech production, from message formulation to articulation to self-evaluation of speech.

# Guidelines for Submissions

Manuscripts for **Computational Linguistics** should be submitted on letter-size paper (8.5 by 11 inches, or A4), double-spaced throughout, including footnotes and references. The paper should begin with an informative abstract of approximately 150–250 words. Manuscripts must be written in English. Contact the editor regarding the possibility of electronic submission.

Submissions may be made in any of the following categories:

**Papers:** This category includes contributions that report significant new research results in computational linguistics or that provide critical reviews of the literature on a particular topic. The length of a paper depends on its content, but it is suggested that manuscripts be limited to forty double-spaced pages. That is the equivalent of thirty journal pages. Each paper is fully refereed, being read by at least two members of the editorial board and usually by an additional expert in the particular subject area. The submission of an article to CL for refereeing means that the author certifies the manuscript is not copyrighted; nor has it been published or submitted for publication to another refereed journal. If any version of the paper has appeared, or will appear, in a non-refereed publication, the details of such publication must be made known to the Editor at the time of submission. The final version of a paper tentatively accepted for publication must be accompanied by a Copyright Transfer Agreement signed by all of the authors or, in the case of a "work for hire," by the employer. This written transfer is necessary under the 1978 U.S. Copyright law.

**Letters to the Editor:** This category includes statements of opinion on issues relevant to the readership. The Editor and the editorial board will evaluate the appropriateness of these contributions for inclusion.

Five copies of papers or three copies of letters should be sent to:

James F. Allen, CL Editor  
University of Rochester  
Department of Computer Science  
Rochester, NY 14627, USA  
(+1 716) 275-5288; acl@cs.rochester.edu

**Squibs and Discussions:** This category includes short articles reporting technical results, discussions of results, algorithms, or new computational linguistic data or tools of interest to the journal readership. Submissions should generally not exceed eight double-spaced pages and should be submitted to:

James Pustejovsky, CL Squibs and Discussions Co-Editor  
Brandeis University  
Computer Science Department  
Waltham, MA 02254, USA  
(+1 617) 736-2709; jamesp@cs.brandeis.edu

**Book Section:** Anyone interested in reviewing a book, or in suggesting a book for review, should contact the Book Review Editor; publishers may also submit copies of books for review directly to:

Graeme Hirst, CL Book Review Editor  
University of Toronto  
Department of Computer Science  
Toronto, CANADA M5S 1A4  
(+1 416) 978-8747; gh@cs.toronto.edu

**The FINITE STRING:** Send (a) summaries of research in progress — of particular interest would be perspectives on the activities at a particular institution; (b) announcements of meetings of potential interest to the membership; and (c) personal notes (e.g., honors, moving, changes in status) to The FINITE STRING Editor. Time-sensitive material should be received by the first day of the second month of each quarter to appear in the next issue. Submissions (where possible in electronic form) should be sent to:

Ralph Weischedel, FINITE STRING Editor  
BBN Systems & Technologies  
10 Moulton Street  
Cambridge, MA 02138, USA  
(+1 617) 873-3496; weischedel@bbn.com

Founded in 1962, the Association for Computational Linguistics (ACL) is the primary scientific and professional society for natural language processing research and applications. A European chapter was established in 1982. Besides publishing *Computational Linguistics*, the ACL holds international meetings (annually in North America, biennially in Europe) where the state-of-the-art in natural language processing research and development is presented. It also sponsors a series of books on natural language processing through The MIT Press. Recently, special interest groups on the Mathematics of Language, the Lexicon, Parsing, Generation, and Computational Phonology have been formed; others are likely to be added.
