

Proceedings of **IWCS 2017 short papers volume, ACL anthology W17-69xx.**

**12th International Conference on Computational Semantics, Montpellier 19-22 September 2017**

**Edited by Claire Gardent (CNRS, LORIA Nancy) & Christian Retoré (Université de Montpellier & LIRMM)**

Out of the 66 short submissions we received, 35 were selected. They have been completed by 9 of the 37 long submissions that were accepted as short papers. Thus 44 short papers were presented as posters preceded by a lightning talk and are included as 8 page papers in this volume. They are listed below. We thank the authors for their submissions, as well as the program committee listed below for their help with the reviews and the selection process.
