Machine Translation

Editor:

Sergei Nirenburg, *Carnegie Mellon University, Center for Machine Translation, Pittsburgh, PA, USA*

Machine Translation publishes high-quality technical articles dealing, in a theoretical, descriptive, or computational aspect, with ANY topic that contributes to the advance of machine translation and machine-aided translation. The following list, though by no means exhaustive, suggests the major fields of interest:

- machine translation
- human-aided machine translation
- machine-aided human translation systems
- theory and methodology of translation
- natural language parsing – morphological, syntactic, semantic and pragmatic – as it pertains to machine translation
- natural language generation, as it pertains to machine translation
- all aspects of acquisition, representation and use of linguistic and encyclopedic knowledge for translation
- lexicographic support for translation, including machine-readable dictionaries
- machine translation as an application of theoretical linguistics: theories of syntax, semantics and pragmatics, as they pertain to translation
- actual computationally relevant descriptions of various syntactic and semantic phenomena in particular languages, and, especially, comparative and contrastive linguistic studies of such phenomena in sets of languages
- machine translation as an application area of artificial intelligence
- sub-languages, restricted domains and machine translation
- data models and database management for machine translation
- computational system architectures for machine translation
- programming and knowledge representation languages useful for machine translation
- computational tools for machine translation
- human engineering aspects of machine translation systems (computing environments)
- organization, management and evaluation of machine translation projects

Guidelines for Submissions

Manuscripts for **Computational Linguistics** should be submitted on letter-size paper (8.5 by 11 inches, or A4), double-spaced throughout, including footnotes and references. The paper should begin with an informative abstract of approximately 150–250 words. Manuscripts must be written in English. Contact the editor regarding the possibility of electronic submission.

Submissions may be made in any of the following categories:

Papers: This category includes contributions that report significant new research results in computational linguistics or that provide critical reviews of the literature on a particular topic. The length of a paper depends on its content, but it is suggested that manuscripts be limited to forty double-spaced pages. That is the equivalent of thirty journal pages. Each paper is fully refereed, being read by at least two members of the editorial board and usually by an additional expert in the particular subject area. The submission of an article to CL for refereeing means that the author certifies the manuscript is not copyrighted; nor has it been published or submitted for publication to another refereed journal. If any version of the paper has appeared, or will appear, in a non-refereed publication, the details of such publication must be made known to the Editor at the time of submission. The final version of a paper tentatively accepted for publication must be accompanied by a Copyright Transfer Agreement signed by all of the authors or, in the case of a "work for hire," by the employer. This written transfer is necessary under the 1978 U.S. Copyright law.

Letters to the Editor: This category includes statements of opinion on issues relevant to the readership. The Editor and the editorial board will evaluate the appropriateness of these contributions for inclusion.

Five copies of papers or three copies of letters should be sent to:

Julia Hirschberg, CL Editor
AT&T Bell Laboratories
600 Mountain Avenue, 2D-450
Murray Hill, NJ 07974, USA
(+1 908) 582-7496; julia@research.att.com

Squibs and Discussions: This category includes short articles reporting technical results, discussions of results, algorithms, or new computational linguistic data or tools of interest to the journal readership. Submissions should generally not exceed eight double-spaced pages and should be submitted to:

James Pustejovsky, CL Squibs and Discussions Co-Editor
Brandeis University
Computer Science Department
Waltham, MA 02254, USA
(+1 617) 736-2709; jamesp@cs.brandeis.edu

Book Section: Anyone interested in reviewing a book, or in suggesting a book for review, should contact the Book Review Editor; publishers may also submit copies of books for review directly to:

Graeme Hirst, CL Book Review Editor
University of Toronto
Department of Computer Science
Toronto, CANADA M5S 1A4
(+1 416) 978-8747; gh@cs.toronto.edu

The FINITE STRING: Send (a) summaries of research in progress — of particular interest would be perspectives on the activities at a particular institution; (b) announcements of meetings of potential interest to the membership; and (c) personal notes (e.g., honors, moving, changes in status) to The FINITE STRING Editor. Time-sensitive material should be received by the first day of the second month of each quarter to appear in the next issue. Submissions (where possible in electronic form) should be sent to:

Ralph Weischedel, FINITE STRING Editor
BBN Systems & Technologies
10 Moulton Street
Cambridge, MA 02138, USA
(+1 617) 873–3496; weischedel@bbn.com

Founded in 1962, the Association for Computational Linguistics (ACL) is the primary scientific and professional society for natural language processing research and applications. A European chapter was established in 1982. Besides publishing *Computational Linguistics*, the ACL holds international meetings (annually in North America, biennially in Europe) where the state-of-the-art in natural language processing research and development is presented. It also sponsors a series of books on natural language processing through The MIT Press. Recently, special interest groups on the Mathematics of Language, the Lexicon, Parsing, Generation, Computational Phonology, and Multimedia Language Processing have been formed; others are likely to be added.
