

## Responsible NLP Checklist

Paper title: *SocioBench: Modeling Human Behavior in Sociological Surveys with Large Language Models*

Authors: *jia WANG, Ziyu Zhao, Tingjuntao Ni, zhongyu wei*

How to read the checklist symbols:

- the authors responded 'yes'
- the authors responded 'no'
- the authors indicated that the question does not apply to their work
- the authors did not respond to the checkbox question

For background on the checklist and guidance provided to the authors, see the [Responsible NLP Checklist](#) page at ACL Rolling Review.

---

### A. Questions mandatory for all submissions.

- A1. Did you describe the limitations of your work?

*This paper has a Limitations section.*

- A2. Did you discuss any potential risks of your work?

*Ethic Statement. The original data used in this article have been authorized by the data provider, and the details are described in the Ethic Statement.*

### B. Did you use or create scientific artifacts? (e.g. code, datasets, models)

- B1. Did you cite the creators of artifacts you used?

*section 1, section 2, section 3*

- B2. Did you discuss the license or terms for use and/or distribution of any artifacts?

*The models used in this article are open source models and commercial APIs used by the closed source model GPT-4o.*

- B3. Did you discuss if your use of existing artifact(s) was consistent with their intended use, provided that it was specified? For the artifacts you create, do you specify intended use and whether that is compatible with the original access conditions (in particular, derivatives of data accessed for research purposes should not be used outside of research contexts)?

*Abstract. The benchmark we constructed has been open sourced on GitHub.*

- B4. Did you discuss the steps taken to check whether the data that was collected/used contains any information that names or uniquely identifies individual people or offensive content, and the steps taken to protect/anonymize it?

*Ethic Statement*

- B5. Did you provide documentation of the artifacts, e.g., coverage of domains, languages, and linguistic phenomena, demographic groups represented, etc.?

*section 1, Appendix A*

- B6. Did you report relevant statistics like the number of examples, details of train/test/dev splits, etc. for the data that you used/created?

*section 1, Appendix A*

*The Responsible NLP Checklist used at ACL Rolling Review is adopted from NAACL 2022, with the addition of ACL 2023 question on AI writing assistance and further refinements based on ARR practice.*

**C. Did you run computational experiments?**

C1. Did you report the number of parameters in the models used, the total computational budget (e.g., GPU hours), and computing infrastructure used?

*section 3*

C2. Did you discuss the experimental setup, including hyperparameter search and best-found hyperparameter values?

*section 3*

C3. Did you report descriptive statistics about your results (e.g., error bars around results, summary statistics from sets of experiments), and is it transparent whether you are reporting the max, mean, etc. or just a single run?

*section 3, section4*

C4. If you used existing packages (e.g., for preprocessing, for normalization, or for evaluation, such as NLTK, SpaCy, ROUGE, etc.), did you report the implementation, model, and parameter settings used?

*section 3*

**D. Did you use human annotators (e.g., crowdworkers) or research with human subjects?**

D1. Did you report the full text of instructions given to participants, including e.g., screenshots, disclaimers of any risks to participants or annotators, etc.?

*In this study, human experts only verified the accuracy of the LLM's conversion of the original PDF data, both before and after the extraction process.*

D2. Did you report information about how you recruited (e.g., crowdsourcing platform, students) and paid participants, and discuss if such payment is adequate given the participants' demographic (e.g., country of residence)?

*This experiment does not involve related content.*

D3. Did you discuss whether and how consent was obtained from people whose data you're using/curating (e.g., did your instructions explain how the data would be used)?

*Ethic Statement. We contacted the official data provider and obtained their permission via email to use the dataset for the experiments, benchmark construction, and open-sourcing described in this paper.*

D4. Was the data collection protocol approved (or determined exempt) by an ethics review board?

*This experiment does not involve related content.*

D5. Did you report the basic demographic and geographic characteristics of the annotator population that is the source of the data?

*section 1, Appendix A*

**E. Did you use AI assistants (e.g., ChatGPT, Copilot) in your research, coding, or writing?**

E1. If you used AI assistants, did you include information about their use?

*We only used an AI assistant to refine some of the wording in the article.*
