## Preface

Welcome to the 5<sup>th</sup> Social Media Mining for Health Applications Workshop & Shared Task (#SMM4H 2020), co-located at the 28<sup>th</sup> International Conference on Computational Linguistics (COLING 2020). In its fifth iteration, #SMM4H 2020 continues to serve as a venue for bringing together researchers interested in addressing the significant opportunities and challenges of utilizing the vast amount of data on social media for health informatics. For #SMM4H 2020, we accepted 5 workshop papers (acceptance rate of 56%) and 26 shared task system description papers. Each submission was peer-reviewed by two reviewers.

The accepted workshop papers span a range of social media data—Twitter, Facebook, Reddit, and online health forums—and health domains, including diabetes, depression, COVID-19, medical misinformation, and adverse drug reactions. Cornelius et al. present an online platform that aggregates and visualizes methods for extracting information related to COVID-19 on Twitter. Dirkson et al. explore modeling conversational features of posts, in addition to the posts themselves, for detecting adverse drug reactions on Facebook, and medical misinformation. Romberg et al. present an annotated, German-language corpus for extracting information needs expressed online by patients with diabetes. Moßburger et al. use various text mining techniques to compare features of depression forums on Reddit and a curated, moderated site. Finally, Owen et al. present an annotated, English-language corpus for detecting depression and anxiety on Twitter.

The #SMM4H 2020 shared tasks sought to advance the use of Twitter data (tweets) for pharmacovigilance, toxicovigilance, and epidemiology of birth defects. In addition to re-runs of three tasks, #SMM4H 2020 included new tasks for detecting adverse drug reactions in French and Russian tweets, characterizing chatter related to prescription medication abuse, and detecting self reports of birth defect pregnancy outcomes. The five tasks required methods for binary classification, multi-class classification, and named entity recognition (NER). With 29 teams and a total of 130 system submissions, participation in the #SMM4H shared tasks continues to grow. Among the 26 shared task system description papers that were accepted, 6 teams were invited to present their system orally.

The organizing committee of #SMM4H 2020 would like to thank the program committee, the additional reviewers of system description papers, the organizers of COLING 2020 (especially the workshop co-chairs), the annotators of the shared task data, and, of course, everyone who submitted a paper or participated in the shared tasks. #SMM4H 2020 would not have been possible without all of them.

Graciela, Ari, Ivan, Davy, Arjun, Karen, Abeed, Anne-Lyse, Elena, Zulfat, Ilseyar

## **Organizing and Program Committees**

### **Organizing Committee:**

Graciela Gonzalez-Hernandez, University of Pennsylvania, USA  
Ari Z. Klein, University of Pennsylvania, USA  
Ivan Flores, University of Pennsylvania, USA  
Davy Weissenbacher, University of Pennsylvania, USA  
Arjun Magge, University of Pennsylvania, USA  
Karen O'Connor, University of Pennsylvania, USA  
Abeed Sarker, Emory University, USA  
Anne-Lyse Minard, Université d'Orléans, France  
Elena Tutubalina, Kazan Federal University, Russia  
Zulfat Miftahutdinov, Kazan Federal University, Russia  
Ilseyar Alimova, Kazan Federal University, Russia

### **Program Committee:**

Robert Leaman, US National Library of Medicine, USA  
Diego Molla, Macquarie University, Australia  
Azadeh Nikfarjam, Apple, USA  
Thierry Poibeau, French National Center for Scientific Research, France  
Kirk Roberts, University of Texas Health Science Center at Houston, USA  
Yutaka Sasaki, Toyota Technological Institute, Japan  
H. Andrew Schwartz, Stony Brook University, USA  
Nicolas Turenne, French National Institute for Agricultural Research, France  
Karin Verspoor, University of Melbourne, Australia  
Pierre Zweigenbaum, French National Center for Scientific Research, France

## Table of Contents

<i>COVID-19 Twitter Monitor: Aggregating and Visualizing COVID-19 Related Trends in Social Media</i>	
Joseph Cornelius, Tilia Ellendorff, Lenz Furrer and Fabio Rinaldi .....	1
<i>Conversation-Aware Filtering of Online Patient Forum Messages</i>	
Anne Dirkson, Suzan Verberne and Wessel Kraaij .....	11
<i>Annotating Patient Information Needs in Online Diabetes Forums</i>	
Julia Romberg, Jan Dyczmons, Sandra Olivia Borgmann, Jana Sommer, Markus Vomhof, Cecilia Brunoni, Ismael Bruck-Ramisch, Luis Enders, Andrea Icks and Stefan Conrad .....	19
<i>Overview of the Fifth Social Media Mining for Health Applications (#SMM4H) Shared Tasks at COLING 2020</i>	
Ari Klein, Ilseyar Alimova, Ivan Flores, Arjun Magge, Zulfat Miftahutdinov, Anne-Lyse Minard, Karen O'Connor, Abeed Sarker, Elena Tutubalina, Davy Weissenbacher and Graciela Gonzalez-Hernandez .....	27
<i>Ensemble BERT for Classifying Medication-mentioning Tweets</i>	
Huong Dang, Kahyun Lee, Sam Henry and Özlem Uzuner .....	37
<i>ISLab System for SMM4H Shared Task 2020</i>	
Chen-Kai Wang, Hong-Jie Dai, You-Chen Zhang, Bo-Chun Xu, Bo-Hong Wang, You-Ning Xu, Po-Hao Chen and Chung-Hong Lee .....	42
<i>BERT Implementation for Detecting Adverse Drug Effects Mentions in Russian</i>	
Andrey Gusev, Anna Kuznetsova, Anna Polyanskaya and Egor Yatsishin .....	46
<i>KFU NLP Team at SMM4H 2020 Tasks: Cross-lingual Transfer Learning with Pretrained Language Models for Drug Reactions</i>	
Zulfat Miftahutdinov, Andrey Sakhovskiy and Elena Tutubalina .....	51
<i>SMM4H Shared Task 2020 - A Hybrid Pipeline for Identifying Prescription Drug Abuse from Twitter: Machine Learning, Deep Learning, and Post-Processing</i>	
Isabel Metzger, Emir Y. Haskovic, Allison Black, Whitley M. Yi, Rajat S. Chandra, Mark T. Rutledge, William McMahon and Yindalon Aphinyanaphongs .....	57
<i>Automatic Detecting for Health-related Twitter Data with BioBERT</i>	
Yang Bai and Xiaobing Zhou .....	63
<i>Exploring Online Depression Forums via Text Mining: A Comparison of Reddit and a Curated Online Forum</i>	
Luis Moßburger, Felix Wende, Kay Brinkmann and Thomas Schmidt .....	70
<i>Towards Preemptive Detection of Depression and Anxiety in Twitter</i>	
David Owen, Jose Camacho-Collados and Luis Espinosa Anke .....	82
<i>Identifying Medication Abuse and Adverse Effects from Tweets: University of Michigan at #SMM4H 2020</i>	
V.G.Vinod Vydiswaran, Deahan Yu, Xinyan Zhao, Ermioni Carr, Jonathan Martindale, Jingcheng Xiao, Noha Ghannam, Matteo Althoen, Alexis Castellanos, Neel Patel and Daniel Vasquez .....	90
<i>How Far Can We Go with Just Out-of-the-box BERT Models?</i>	
Lucie Gattepaille .....	95

<i>FBK@SMM4H2020: RoBERTa for Detecting Medications on Twitter</i>	101
Silvia Casola and Alberto Lavelli .....	101
<i>Autobots Ensemble: Identifying and Extracting Adverse Drug Reaction from Tweets Using Transformer Based Pipelines</i>	104
Sougata Saha, Souvik Das, Prashi Khurana and Rohini Srihari .....	104
<i>Transformer Models for Drug Adverse Effects Detection from Tweets</i>	110
Pavel Blinov and Manvel Avetisian .....	110
<i>Adverse Drug Reaction Detection in Twitter Using RoBERTa and Rules</i>	113
Sedigh Khademi, Pari Delirhaghghi and Frada Burstein .....	113
<i>SpeechTrans@SMM4H'20: Impact of Preprocessing and N-grams on Automatic Classification of Tweets That Mention Medications</i>	118
Mohamed Lichouri and Mourad Abbas .....	118
<i>Want to Identify, Extract and Normalize Adverse Drug Reactions in Tweets? Use RoBERTa</i>	121
Katikapalli Subramanyam Kalyan and Sivanesan Sangeetha.....	121
<i>Detecting Tweets Reporting Birth Defect Pregnancy Outcome Using Two-View CNN RNN Based Architecture</i>	125
Saichethan Reddy .....	125
<i>Identification of Medication Tweets Using Domain-specific Pre-trained Language Models</i>	128
Yandrapati Prakash Babu and Rajagopal Eswari .....	128
<i>Medication Mention Detection in Tweets Using ELECTRA Transformers and Decision Trees</i>	131
Lung-Hao Lee, Po-Han Chen, Hao-Chuan Kao, Ting-Chun Hung, Po-Lei Lee and Kuo-Kai Shyu .....	131
<i>LITL at SMM4H: An Old-school Feature-based Classifier for Identifying Adverse Effects in Tweets</i>	134
Ludovic Tanguy, Lydia-Mai Ho-Dac, Cécile Fabre, Roxane Bois, Touati Mohamed Yacine Haddad, Claire Ibarboure, Marie Joyau, François Le moal, Jade Moiilic, Laura Roudaut, Mathilde Simounet, Irena Stankovic and Mickaela Vandewaetere .....	134
<i>Sentence Classification with Imbalanced Data for Health Applications</i>	138
Farhana Ferdousi Liza .....	138
<i>HITSZ-ICRC: A Report for SMM4H Shared Task 2020-Automatic Classification of Medications and Adverse Effect in Tweets</i>	146
Xiaoyu Zhao, Ying Xiong and Buzhou Tang .....	146
<i>Automatic Classification of Tweets Mentioning a Medication Using Pre-trained Sentence Encoders</i>	150
Laiba Mehnaz .....	150
<i>Approaching SMM4H 2020 with Ensembles of BERT Flavours</i>	153
George-Andrei Dima, Andrei-Marius Avram and Dumitru-Clementin Cercel .....	153
<i>NLP@VCU: Identifying Adverse Effects in English Tweets for Unbalanced Data</i>	158
Darshini Mahendran, Cora Lewis and Bridget McInnes.....	158
<i>Sentence Transformers and Bayesian Optimization for Adverse Drug Effect Detection from Twitter</i>	161
Oguzhan Gencoglu .....	161

<i>Sentence Contextual Encoder with BERT and BiLSTM for Automatic Classification with Imbalanced Medication Tweets</i>	
Olanrewaju Tahir Aduragba, Jialin Yu, Gautham Senthilnathan and Alexandra Crsitea .....	165
<i>CLaC at SMM4H 2020: Birth Defect Mention Detection</i>	
Parsa Bagherzadeh and Sabine Bergler.....	168

# Workshop Program

Saturday, December 12, 2020

14:00–14:10 *Introduction*  
Graciela Gonzalez-Hernandez

14:10–14:50 **Oral Presentations Q&A Session 1**

*COVID-19 Twitter Monitor: Aggregating and Visualizing COVID-19 Related Trends in Social Media*

Joseph Cornelius, Tilia Ellendorff, Lenz Furrer and Fabio Rinaldi

*Conversation-Aware Filtering of Online Patient Forum Messages*

Anne Dirkson, Suzan Verberne and Wessel Kraaij

*Annotating Patient Information Needs in Online Diabetes Forums*

Julia Romberg, Jan Dyczmons, Sandra Olivia Borgmann, Jana Sommer, Markus Vomhof, Cecilia Brunoni, Ismael Bruck-Ramisch, Luis Enders, Andrea Icks and Stefan Conrad

*Overview of the Fifth Social Media Mining for Health Applications (#SMM4H) Shared Tasks at COLING 2020*

Ari Klein, Ilseyar Alimova, Ivan Flores, Arjun Magge, Zulfat Miftahutdinov, Anne-Lyse Minard, Karen O'Connor, Abee Sarker, Elena Tutubalina, Davy Weissenbacher and Graciela Gonzalez-Hernandez

14:50–15:00 **Break**

15:00–15:40 *Invited Talk*  
Fabio Rinaldi

15:40–15:50 **Break**

15:50–16:30 **Oral Presentations Q&A Session 2**

*Ensemble BERT for Classifying Medication-mentioning Tweets*

Huong Dang, Kahyun Lee, Sam Henry and Özlem Uzuner

*ISLab System for SMM4H Shared Task 2020*

Chen-Kai Wang, Hong-Jie Dai, You-Chen Zhang, Bo-Chun Xu, Bo-Hong Wang, You-Ning Xu, Po-Hao Chen and Chung-Hong Lee

*BERT Implementation for Detecting Adverse Drug Effects Mentions in Russian*

Andrey Gusev, Anna Kuznetsova, Anna Polyanskaya and Egor Yatsishin

*KFU NLP Team at SMM4H 2020 Tasks: Cross-lingual Transfer Learning with Pre-trained Language Models for Drug Reactions*

Zulfat Miftahutdinov, Andrey Sakhovskiy and Elena Tutubalina

**Saturday, December 12, 2020 (continued)**

16:30–17:30 **Poster Session**

17:30–17:40 **Break**

17:40–18:20 **Oral Presentations Q&A Session 3**

*SMM4H Shared Task 2020 - A Hybrid Pipeline for Identifying Prescription Drug Abuse from Twitter: Machine Learning, Deep Learning, and Post-Processing*

Isabel Metzger, Emir Y. Haskovic, Allison Black, Whitley M. Yi, Rajat S. Chandra, Mark T. Rutledge, William McMahon and Yindalon Aphinyanaphongs

*Automatic Detecting for Health-related Twitter Data with BioBERT*

Yang Bai and Xiaobing Zhou

*Exploring Online Depression Forums via Text Mining: A Comparison of Reddit and a Curated Online Forum*

Luis Moßburger, Felix Wende, Kay Brinkmann and Thomas Schmidt

*Towards Preemptive Detection of Depression and Anxiety in Twitter*

David Owen, Jose Camacho-Collados and Luis Espinosa Anke

18:20–18:30 *Conclusion*

Graciela Gonzalez-Hernandez
