## **Introduction**

It is our great pleasure to welcome you to the Second Workshop on When Creative AI Meets Conversational AI (CAI2).

This workshop focuses on intersection directions of creative AI and conversational AI that are influencing millions of people by real-world applications, such as digital assistants, virtual singers, voice boxes and metaverse. With the rapid development of emotional, creative digital assistants, we believe that future conversational AI systems can be further enhanced and boosted by the rapid developing creative AI technique: poeming, painting, gaming, and singing.

We have received a large number of submissions and accepted 9 long and short research papers. The papers cover directions of emotional chatbots, task-oriented question answering, humor detection, language models for speech recognition, task-oriented data construction, AI writing assisting, dialog controlling by prompts, food preference detection through conversation, and diffusion models for artwork creation.

We would like to thank everyone who submitted a paper to the workshop. We would also like to express our gratitude to the members of the Program Committee for their timely reviews, and for supporting the tight schedule by providing reviews at short notice.

We hope that you enjoy the workshop!

The CAI2 Organizers

October 2022

## **Organizing Committee**

Xianchao Wu (He, NVIDIA)

Gang Niu (He, RIKEN)

Lin Gu (He, RIKEN)

Peiyong Ruan (She, NVIDIA)

Haitao Yu (He, University of Tsukuba)

Xuemeng (Maggie) Zhang (She, NVIDIA)

Yi Dong (He, NVIDIA)

Hao Gong (He, NVIDIA)

## **PC Members**

Yi Zhao (She, Kwai)

Yulan Yan (She, Databricks)

Sheng Li (He, NICT)

Chunmeng Ma (He, Fujitsu)

## Table of Contents

<i>Prompting for a conversation: How to control a dialog model?</i> Josef Valvoda, Yimai Fang and David Vandyke .....	1
<i>Most Language Models can be Poets too: An AI Writing Assistant and Constrained Text Generation Studio</i> Allen Roush, Sanjay Basu, Akshay Moorthy and Dmitry Dubovoy .....	9
<i>An Emotion-based Korean Multimodal Empathetic Dialogue System</i> Minyoung Jung, Yeongbeom Lim, San Kim, Jin Yea Jang, Saim Shin and Ki-Hoon Lee .....	16
<i>BETOLD: A Task-Oriented Dialog Dataset for Breakdown Detection</i> Silvia Terragni, Bruna Guedes, Andre Manso, Modestas Filipavicius, Nghia Khau and Roland Mathis .....	23
<i>Insurance Question Answering via Single-turn Dialogue Modeling</i> Seon-Ok Na, Young-Min Kim and Seung-Hwan Cho .....	35
<i>Can We Train a Language Model Inside an End-to-End ASR Model? - Investigating Effective Implicit Language Modeling</i> Zhuo Gong, Daisuke Saito, Sheng Li, Hisashi Kawai and Nobuaki Minematsu .....	42
<i>Semantic Content Prediction for Generating Interviewing Dialogues to Elicit Users' Food Preferences</i> Jie Zeng, Tatsuya Sakato and Yukiko Nakano .....	48
<i>Creative Painting with Latent Diffusion Models</i> Xianchao Wu .....	59
<i>Learning to Evaluate Humor in Memes Based on the Incongruity Theory</i> Kohtaro Tanaka, Hiroaki Yamane, Yusuke Mori, Yusuke Mukuta and Tatsuya Harada .....	81
