

## Responsible NLP Checklist

Paper title: *The GDN-CC Dataset: Automatic Corpus Clarification for AI-enhanced Democratic Citizen Consultations*

Authors: *Pierre-Antoine Lequeu, Lo Labat, Lurne Cave, Gal Lejeune, Francois Yvon, Benjamin Piwowarski*

How to read the checklist symbols:

- the authors responded 'yes'
- the authors responded 'no'
- N/A the authors indicated that the question does not apply to their work
- the authors did not respond to the checkbox question

For background on the checklist and guidance provided to the authors, see the [Responsible NLP Checklist](#) page at ACL Rolling Review.

---

### A. Questions mandatory for all submissions.

A1. Did you describe the limitations of your work?  
*This paper has a Limitations section.*

A2. Did you discuss any potential risks of your work?  
*Ethical Considerations section*

### B. Did you use or create scientific artifacts? (e.g. code, datasets, models)

B4. Did you discuss the steps taken to check whether the data that was collected/used contains any information that names or uniquely identifies individual people or offensive content, and the steps taken to protect/anonymize it?  
*Ethical Consideration section and Appendix A.2*

B6. Did you report relevant statistics like the number of examples, details of train/test/dev splits, etc. for the data that you used/created?  
*Section 5.1*

### C. Did you run computational experiments?

C2. Did you discuss the experimental setup, including hyperparameter search and best-found hyperparameter values?  
*Section 6 and Appendices C.1 and C.2*

C3. Did you report descriptive statistics about your results (e.g., error bars around results, summary statistics from sets of experiments), and is it transparent whether you are reporting the max, mean, etc. or just a single run?  
*Appart from the learning rate grid-search, we did not train the models multiple times on the data, so we did not get error rates.*

### D. Did you use human annotators (e.g., crowdworkers) or research with human subjects?

D1. Did you report the full text of instructions given to participants, including e.g., screenshots, disclaimers of any risks to participants or annotators, etc.?  
*Appendix A.1 and A.2*

*The Responsible NLP Checklist used at ACL Rolling Review is adopted from NAACL 2022, with the addition of ACL 2023 question on AI writing assistance and further refinements based on ARR practice. ACL 2026 used a subset of ARR checklist form.*

- D2. Did you report information about how you recruited (e.g., crowdsourcing platform, students) and paid participants, and discuss if such payment is adequate given the participants' demographic (e.g., country of residence)?

*Appendix A.2*

- D3. Did you discuss whether and how consent was obtained from people whose data you're using/curating (e.g., did your instructions explain how the data would be used)?

*Ethical Considerations section*

- D4. Was the data collection protocol approved (or determined exempt) by an ethics review board?

*As our work only transforms already public data, it was not deemed useful.*

- E. Did you use AI assistants (e.g., ChatGPT, Copilot) in your research, coding, or writing?**

- E1. If you used AI assistants, did you include information about their use?

*Privately revealed to ACL ARR 2026 January Program Chairs, ACL ARR 2026 January Submission6383 Area Chairs, ACL ARR 2026 January Submission6383 Authors, ACL ARR 2026 January Submission6383 Reviewers, ACL ARR 2026 January Submission6383 Senior Area Chairs For code, AI was used to help the development of the annotation interface, as well as some of the analysis scripts. For writing, AI was used to help rephrase some parts of the text in proper English.*
