

Input: {"ID": "stance26_aspect_va_dev_10",

"Text": "Say somehow we succeed and now have access to unlimited clean energy. What happens then ? Do we swap over to this new energy ? Do politicians in the pocket of oil and gas companies stop it from progressing ? Does having no energy limits lead to an even greater population problem around the world ? Could it lead to space exploration with rockets thats have unlimited fuel ? I'm far too dumb to understand the science but it is crazy to me that it is something I could potentially see in my lifetime.",

"Aspect": ["unlimited clean energy", "space exploration"] }
