

Cook's eye fell on a stack of mail at the edge of the counter. On top of it was the latest issue of *Linguistic Inquiry*. He smiled—the journal was like an old friend in hostile territory....
—*The Full Catastrophe* David Carkeet

Highly respected for its sustained excellence in quality of scholarship, *Linguistic Inquiry* leads the field in research on current topics in linguistic theory. Issue after issue, *LI* keeps you informed of new theoretical developments by presenting the latest in international research.

Contributors include some of the world's most celebrated linguists whose articles transcend disciplinary boundaries and bridge language families.

Computers and Human Language

GEORGE W. SMITH,
*University of Massachusetts,
Boston*

"A beautiful treatment of computational linguistics from the computer sciences point of view."—Robert F. Simmons, *University of Texas*

"A well-written introduction to computational linguistics. I am particularly impressed by the broad range of topics covered...The list of references is also comprehensive."
—Martin Volk, *University of Koblenz*

"Looks quite good, and seems well suited to my course, an introduction to parsing and linguistic theory for...linguistics students with little or no computational background." —Stanley Starosta, *University of Hawaii*

"Very well-organized....Covers the full range of computational linguistics."—Peter Jeang, *Bloomfield College*

Among the topics considered are the computationally symbolic basis of language, lexicons as repositories of information, automated text processing, phonology, phototactics, speech synthesis and the persisting challenge of continuous speech, transformational grammars and their successors, linguistic and conceptual approaches to sentence meaning, and discourse coherence and plan-based bridging inferences. The text also explores such up-to-the-minute subjects as neurally-inspired computing, parsing and psychological plausibility, the controversial representation hypothesis, and the ramifications of discourse "focus." With its clear, engaging style and gradual, systematic exposition, *Computers and Human Language* makes the fast-moving world of computational linguistics accessible to the beginning student.

THE ACL-MIT PRESS SERIES in NATURAL LANGUAGE PROCESSING

Aravind K. Joshi, Karen Sparck Jones, Mark Y. Liberman,
Editors

The ACL Series will offer books of high quality in the field of natural language processing, including human and machine speech production and understanding. It will cover a wide range of topics, both theoretical and applied, which should interest researchers not only in computational linguistics, but also in formal linguistics.

The Series will include specially commissioned volumes, research monographs, textbooks, and on occasion, collections of high quality papers with clear unifying themes compiled under the editorship of distinguished researchers.

The MIT Press publishes the ACL journal, *Computational Linguistics*. The Press also has a strong list in formal linguistics and publishes the journal *Linguistic Inquiry*.

Submissions for the ACL Series should be directed to one of the Editors, or to Henry Bradford Stanton at The MIT Press

GENERATING REFERRING EXPRESSIONS

Constructing Descriptions in a Domain of Objects and Processes

Robert Dale

Robert Dale presents a detailed description of the development of algorithms for the generation of referring expressions, and of the underlying structures that motivate these algorithms, in a dynamic domain. He provides a number of novel results in both knowledge representation and natural language generation that should have straightforward applications in other domains.

A Bradford Book 288 pp. 133 illus. \$39.95

CONSTRAINT-BASED GRAMMAR FORMALISMS

Parsing and Type Inference for Natural and Computer Languages

Stuart M. Shieber

Constraint-Based Grammar Formalisms introduces new applications to both natural and computer languages. Explored within are explanations of linguistic phenomena such as binding and detailed mathematical analysis of constraint-solving and parsing in a variety of grammar formalisms.

A Bradford Book 200 pp. 21 illus. \$19.95

FOUNDATIONAL ISSUES IN NATURAL LANGUAGE PROCESSING

edited by Peter Sells, Stuart M. Shieber, and Thomas Wasow

A Bradford Book \$32.50

CARTESIAN COMPUTATION

Parsing with Principles and Parameters

Sandiway Fong and Robert C. Berwick

foreword by Noam Chomsky

Cartesian Computation shows for the first time how Noam Chomsky's principles-and-parameters approach to language can be turned into an efficient computer program for analyzing sentences from languages as different as English and Japanese.

350 pp. \$40.00 (August)

MORPHOLOGY AND COMPUTATION

Richard Sproat

This book provides the first broad yet thorough coverage of issues in morphological theory.

A Bradford Book 336 pp., 39 illus. \$35.00

APPROACH TO SYNTAX

Foundations, Specifications, and Implementations of Theories of Government and Binding

Edward P. Stabler, Jr.

Stabler shows how syntactic theories for natural languages can be handled without guesswork or oversimplification.

A Bradford Book 432 pp., 81 illus. \$40.00

COMPUTATIONAL MORPHOLOGY

Practical Mechanisms for the English Lexicon

Graeme D. Ritchie, Graham J. Russell, Alan W. Black, and Stephen G. Pulman

Computational Morphology is the first book to present an integrated set of techniques for the rigorous description of morphological phenomena in English and similar languages.

304 pp. \$32.50

THE CORE LANGUAGE ENGINE

edited by Hiyan Alshawi

Recent research results from different areas of computational linguistics are integrated into a single elegant design with potential for application to tasks ranging from machine translation to information system interfaces.

A Bradford Book 280 pp. \$37.50

COGNITIVE MODELS OF SPEECH PROCESSING

Psycholinguistic & Computational Perspectives

edited by Gerry T.M. Altmann

Cognitive Models of Speech Processing presents extensive reviews of current thinking on psycholinguistic and computational topics in speech recognition and natural language processing, along with a substantial body of new experimental data and computational simulations.

A Bradford Book \$55.00

PLAN RECOGNITION IN NATURAL LANGUAGE DIALOGUE

Sandra Carberry

In most current natural language systems each query is treated as an isolated request for information regardless of its context in dialogue. Sandra Carberry addresses the problem of creating computational strategies that can improve user-computer communication by assimilating ongoing dialogue and reasoning on the acquired knowledge.

A Bradford Book \$35.00

INTENTIONS IN COMMUNICATION

edited by Philip R. Cohen, Jerry Morgan, and Martha E. Pollack

A Bradford Book \$45.00

SPEAKING

From Intention to Articulation

Willem J.M. Levelt

Willem "Pim" Levelt, Director of the Max Planck Institute for Psycholinguistics, covers the entire process of speech production, from message formulation to articulation to self-evaluation of speech.

A Bradford Book \$42.50

In North America, order from Cambridge University Press, Dept GLH, 40 West 20th Street, New York, NY 10011-4211. All orders must be prepaid by check or charged on VISA or MasterCard. Residents of NY and CA add sales tax; Canadian residents add 7% GST. Shipping charges in the U.S. and Canada are \$2.00 for the first book and \$0.75 for each additional book.

Discount offer available to ACL members only.

**CAMBRIDGE
UNIVERSITY PRESS**

ACL 1992 DUES STATEMENT AND CHANGE OF ADDRESS FORM

Provide Complete Information To Insure Accurate ACL MEMBERSHIP DIRECTORY Entry

Membership in the *Association for Computational Linguistics* is for the calendar year, regardless of when dues are paid. Membership includes a full year of the ACL journal **Computational Linguistics**, reduced registration at most ACL-sponsored conferences, and discounts on ACL-sponsored publications. **A late payment fee will be charged for renewals made after 1 March**; this fee does not apply to new members. Students taking a *full-time program of courses and not earning a regular income* qualify for a reduced rate. Institutions now *subscribe* to the journal through MIT Press Journals, 55 Hayward Street, Cambridge, MA 02142 USA; +1-617-253-2889. Back issues and proceedings are available only from the ACL Office, except that institutions should backorder journals from 1988 on through MIT Press. An order form is on the other side of this statement. Payments for dues, back issues, and proceedings can be made in Europe and Japan as well as the U.S. **Most Europeans should pay through Europe**; read the directions under the heading **PAYMENT** below carefully. *Identify your institutional affiliation if it is not part of your address.* Also provide telephone country & city codes and computer network & email address. **Write legibly, please!**

FULL NAME _____

ADDRESS _____

INSTITUTION _____ TELEPHONE _____

COMPUTER NETWORK & EMAIL ADDRESS _____

Provide prompt notification of address changes; copies returned because of bad addresses will not be remailed until a \$3.00 postage and handling fee is remitted.

MEMBERSHIP DUES FOR 1991: Dues for *Regular Members* are \$25. Couples with the same mailing address may become *Joint Members* for \$30; they will receive only one set of publications, but each will be eligible for all other member benefits. Students taking a *full-time program of courses and not earning a regular income* may become *Student Members* for \$15 with copy of current student ID. Students who are not *Student Members* and pay at the Regular rate can still participate in student activities. Surface mailing costs are included in the membership dues.

CHECK: Regular(\$25) Joint(\$30) Student(\$15 with ID) Student-Employed(\$25) DUES \$ _____

Optional 1st class or air (\$10 U.S., Canada, Mexico; \$20 elsewhere): OPTIONAL DUES MAILING \$ _____

\$10 late payment for renewals after 1 March 1992 LATE PAYMENT FEE \$ _____

TOTAL DUES PAYMENT \$ _____

INTERNATIONAL FUND: The ACL set up a fund in 1982 to make ACL memberships and publications available to colleagues who have difficulty in using their national currencies for international transactions or for whom membership would otherwise be impossible. Contributions may be tax-deductible in various countries; check local regulations.

INTERNATIONAL FUND \$ _____

PAYMENT: Prepayment is necessary; invoices are available on request. The U.S. dollar price is definitive when paying in other currencies. Checks and money orders should be made out to the *Association for Computational Linguistics* (or to ACL). Payments can be made to one of the addresses below, as follows:

1. To Walker in the USA; mail this dues statement with a check or money order *payable to ACL*. Bank drafts cannot be accepted. **PAYMENTS MUST BE MADE IN U.S. DOLLARS, DRAWN ON A U.S. BANK OR IN U.S. OR CANADIAN DOLLARS (CONVERTED AT THE CURRENT EXCHANGE RATE), DRAWN ON A CANADIAN BANK.**
2. To Rosner in Europe; mail this dues statement with a check or money order in Swiss francs or the equivalent in your local currency on the day the check is written, *payable to ACL*. Ensure that the check is payable in Switzerland or France. **Do not issue a check or money order in U.S. dollars unless it is drawn on a U.S. Bank.** Payment can also be made by bank transfer to ACL account number 141.880.LAV at the Union Bank of Switzerland, 8 rue de Rhone, CH-1211 Geneva 11, SWITZERLAND. Send Rosner a copy of the bank transfer as well as the dues statement. **EUROPEAN MEMBERS SHOULD PAY THROUGH ROSNER UNLESS THEY HAVE A U.S. OR CANADIAN BANK ACCOUNT.**
3. To Nagao in Japan; transfer an equivalent amount in yen on the day of payment to "Dai-ichi Kangyo Bank, Hyakumanben Branch; Ordinary Deposit, 476-1319944; Name: Keisangengogakkai Kaihi Nagao Makoto." Mail this dues statement to Walker together with a copy of the bank transfer. Also send Nagao a copy of the bank transfer. Note: **THE DUES STATEMENT MUST BE SENT TO WALKER TO BE PROPERLY RECORDED IN THE ACL OFFICE.**

Guidelines for Submissions

Manuscripts for **Computational Linguistics** should be submitted on letter-size paper (8.5 by 11 inches, or A4), double-spaced throughout, including footnotes and references. The paper should begin with an informative abstract of approximately 150–250 words. Manuscripts must be written in English. Contact the editor regarding the possibility of electronic submission.

Submissions may be made in any of the following categories:

Papers: This category includes contributions that report significant new research results in computational linguistics or that provide critical reviews of the literature on a particular topic. The length of a paper depends on its content, but it is suggested that manuscripts be limited to forty double-spaced pages. That is the equivalent of thirty journal pages. Each paper is fully refereed, being read by at least two members of the editorial board and usually by an additional expert in the particular subject area. The submission of an article to CL for refereeing means that the author certifies the manuscript is not copyrighted; nor has it been published or submitted for publication to another refereed journal. If any version of the paper has appeared, or will appear, in a non-refereed publication, the details of such publication must be made known to the Editor at the time of submission. The final version of a paper tentatively accepted for publication must be accompanied by a Copyright Transfer Agreement signed by all of the authors or, in the case of a “work for hire,” by the employer. This written transfer is necessary under the 1978 U.S. Copyright law.

Letters to the Editor: This category includes statements of opinion on issues relevant to the readership. The Editor and the editorial board will evaluate the appropriateness of these contributions for inclusion.

Five copies of papers or three copies of letters should be sent to:

James F. Allen, CL Editor
University of Rochester
Department of Computer Science
Rochester, NY 14627, USA
(+1 716) 275-5288; acl@cs.rochester.edu

Squibs and Discussions: This category includes short articles reporting technical results, discussions of results, algorithms, or new computational linguistic data or tools of interest to the journal readership. Submissions should generally not exceed eight double-spaced pages and should be submitted to:

James Pustejovsky, CL Squibs and Discussions Co-Editor
Brandeis University
Computer Science Department
Waltham, MA 02254, USA
(+1 617) 736-2709; jamesp@cs.brandeis.edu

Book Section: Anyone interested in reviewing a book, or in suggesting a book for review, should contact the Book Review Editor; publishers may also submit copies of books for review directly to:

Graeme Hirst, CL Book Review Editor
University of Toronto
Department of Computer Science
Toronto, CANADA M5S 1A4
(+1 416) 978-8747; gh@cs.toronto.edu

The FINITE STRING: Send (a) summaries of research in progress — of particular interest would be perspectives on the activities at a particular institution; (b) announcements of meetings of potential interest to the membership; and (c) personal notes (e.g., honors, moving, changes in status) to The FINITE STRING Editor. Time-sensitive material should be received by the first day of the second month of each quarter to appear in the next issue. Submissions (where possible in electronic form) should be sent to:

Ralph Weischedel, FINITE STRING Editor
BBN Systems & Technologies
10 Moulton Street
Cambridge, MA 02138, USA
(+1 617) 873-3496; weischedel@bbn.com

Founded in 1962, the Association for Computational Linguistics (ACL) is the primary scientific and professional society for natural language processing research and applications. A European chapter was established in 1982. Besides publishing *Computational Linguistics*, the ACL holds international meetings (annually in North America, biennially in Europe) where the state-of-the-art in natural language processing research and development is presented. It also sponsors a series of books on natural language processing through The MIT Press. Recently, special interest groups on the Mathematics of Language, the Lexicon, Parsing, Generation, and Computational Phonology have been formed; others are likely to be added.
