Preface

The Sixth Conference on Machine Translation (WMT 2021) took place on Wednesday, November 10 and Thursday, November 11, 2021 immediately following the 2021 Conference on Empirical Methods in Natural Language Processing (EMNLP 2021).

This is the sixth time WMT has been held as a conference. The first time WMT was held as a conference was at ACL 2016 in Berlin, Germany, the second time at EMNLP 2017 in Copenhagen, Denmark, the third time at EMNLP 2018 in Brussels, Belgium, the fourth time at ACL 2019 in Florence, Italy, and the fifth time at EMNLP-2020, which was held as an online event due to the COVID-19 pandemic. Prior to being a conference, WMT was held 10 times as a workshop. WMT was held for the first time at HLT-NAACL 2006 in New York City, USA. In the following years the Workshop on Statistical Machine Translation was held at ACL 2007 in Prague, Czech Republic, ACL 2008, Columbus, Ohio, USA, EACL 2009 in Athens, Greece, ACL 2010 in Uppsala, Sweden, EMNLP 2011 in Edinburgh, Scotland, NAACL 2012 in Montreal, Canada, ACL 2013 in Sofia, Bulgaria, ACL 2014 in Baltimore, USA, EMNLP 2015 in Lisbon, Portugal.

The focus of our conference is to bring together researchers from the area of machine translation and invite selected research papers to be presented at the conference.

Prior to the conference, in addition to soliciting relevant papers for review and possible presentation, we conducted 13 shared tasks. These consisted of 10 translation tasks: Machine Translation of News, Similar Language Translation, Biomedical Translation, Multilingual Low-Resource Translation for Indo-European Languages, Large-Scale Multilingual Machine Translation, Triangular MT: Using English to Improve Russian-to-Chinese Machine Translation, Translation Efficiency, Machine Translation using Terminologies, Unsupervised and Very Low Resource Supervised Translation, and Lifelong Learning for Machine Translation, two evaluation tasks: Quality Estimation of Translation and Metrics for Machine Translation, and the Automatic Post-Editing task.

The results of all shared tasks were announced at the conference, and these proceedings also include overview papers for the shared tasks, summarizing the results, as well as providing information about the data used and any procedures that were followed in conducting or scoring the tasks. In addition, there are short papers from each participating team that describe their underlying system in greater detail.

Like in previous years, we have received a far larger number of submissions than we could accept for presentation. WMT 2021 has received 49 full research paper submissions (not counting withdrawn submissions). In total, WMT 2021 featured 18 full research paper presentations and 96 shared task presentations.

The event hosted a panel discussion led by Markus Freitag (Google) on evaluation with Nitika Mathur (Univ. Melbourne), Benjamin Marie (NICT), Ricardo Rei (Unbabel), Tom Kocmi (Microsoft).

We would like to thank the members of the Program Committee for their timely reviews. We also would like to thank the participants of the shared task and all the other volunteers who helped with the evaluations.
