

# **First Conference on Applied Natural Language Processing**

**Association for  
Computational Linguistics**

## **Proceedings of the Conference**

**1–3 February 1983  
Miramar-Sheraton Hotel  
Santa Monica, California, USA**

**Sponsored by the Association for Computational Linguistics  
and the Naval Research Laboratory**

Bellcore  
445 South Street, MRE 2A379  
Morristown, NJ 07960, USA

## **NOTES FROM THE CONFERENCE CHAIR**

This conference focuses on the use of computational linguistic techniques to solve real world problems. Technical papers are presented in sessions on domain-independent natural language interfaces, knowledge-based approaches, handling ill-formed input, text analysis, machine translation, and speech interfaces. A panel considers the impact of natural language access on database design and implementation. There also are demonstrations of working systems; exhibits of special purpose processors, tools, and other materials that support natural language processing; and tutorials covering special topic areas.

I want to share with you my enthusiasm and pleasure about the way in which the conference has developed over the past eighteen months. Many of us have long felt the need for a special meeting devoted to applied natural language processing. The workshop on Applied Computational Linguistics in Perspective, co-sponsored by the Naval Research Laboratory and the ACL and held just before the 1981 ACL Annual Meeting at Stanford University, highlighted this need and started the ball rolling. Incidentally, a report describing that workshop appears in the *American Journal of Computational Linguistics*, Volume 8, Number 2, April-June, 1982.

The response to the call for papers was gratifying both in the interest expressed by diverse groups and in the large number of high quality papers submitted. Selecting the 26 papers for the conference was not an easy task.

I wish to thank Beatrice Oshika, who chaired our program committee, for her hard work in organizing the program, tutorials, exhibits, and demonstrations, and for her general support in seeing that things ran smoothly. Special thanks to Don Walker, our Secretary-Treasurer, for his expertise in handling the funds and for arranging the printing of the call for papers, the program, and the proceedings.

Thanks to the program committee for a job well done, to Doug Hogan, Martin Kay, and Madeleine Bates for their help in reviewing papers, and to the people who are chairing sessions.

In addition, I would like to thank the Naval Research Laboratory for its financial support, which has helped reduce conference costs.

Finally, I would like to thank you, the attendees, for your interest and support; I look forward to participating with you in what I know will be an exciting and rewarding conference.

**Iris Kameny  
General Chair**

## **CONFERENCE COMMITTEE**

**General Chair:** Iris M. Kameny, System Development Corporation

**Program Chair:** Beatrice T. Oshika, System Development Corporation

**Secretary-Treasurer:** Donald E. Walker, SRI International

**Committee Members:** Richard Cantone, Navy Center for Applied Research in Artificial Intelligence  
Christine A. Montgomery, Operating Systems Division, Logicon  
C. Raymond Perrault, University of Toronto  
Jane J. Robinson, SRI International  
Norman K. Sondheimer, USC/Information Sciences Institute

## CONFERENCE PROGRAM

**Tuesday, 1 February 1983**

**8:30-9:15**

OPENING REMARKS: Iris M. Kameny, System Development Corporation  
Stanley Wilson, Naval Research Laboratory

**9:15-10:45**

DOMAIN-INDEPENDENT NATURAL LANGUAGE INTERFACES-Session 1 (pages 1-30)  
Chair: Aravind K. Joshi, University of Pennsylvania

*Problems in natural language interface to DBMS with examples from EUFID*  
Marjorie Templeton and John Burger, System Development Corporation

*Introducing ASK, a simple knowledgeable system*

Bozena H. Thompson and Frederick B. Thompson, California Institute of Technology

*A robust portable natural language data base interface*

Jerrold M. Ginsparg, Bell Laboratories

**11:00-noon**

KNOWLEDGE-BASED APPROACHES-Session 1 (pages 54-68)  
Chair: Ivan A. Sag, Stanford University

*Distinguishing fact from opinion and events from meta-events*

Christine A. Montgomery, Operating System Division, Logicon

*Parsing with logical variables*

Timothy W. Finin and Martha Stone Palmer, University of Pennsylvania

**noon-2:00 LUNCHEON**

GUEST SPEAKER: Dan Schutzer, Technical Director, Office of Naval Intelligence

**2:00-3:00**

HANDLING ILL-FORMED INPUT (pages 89-106)

Chair: Ralph M. Weischedel, University of Delaware

*The 'fitted' parse: 100% parsing capability in a syntactic grammar of English*  
Karen Jensen and George E. Heidorn, IBM Thomas J. Watson Research Center

*Utilizing domain-specific information for processing compact text*

Elaine Marsh, New York University Linguistic String Project

*Scruffy text understanding: design and implementation of the NOMAD system*

Richard H. Granger, Chris J. Staros, Gregory B. Taylor and Rika Yoshii, University of California at Irvine

**4:00-5:30**

TEXT ANALYSIS-Session 1 (pages 107-131)

Chair: Donald E. Walker, SRI International

*Specialized information extraction: automatic chemical reaction coding from English descriptions*  
Larry H. Reeker, Elaine M. Zamora, and Paul E. Blower, Chemical Abstracts Service

*Automatic analysis of descriptive texts*

James R. Cowie, University of Strathclyde

*'Expertness' from structured text? RECONSIDER: a diagnostic prompting program*

Mark S. Tuttle, University of California, San Francisco and Berkeley; David D. Sherertz, Tandem Computers; Marsden S. Blois, University of California, San Francisco; and Stuart Nelson, State University of New York at Stony Brook

**Wednesday, 2 February 1983**

**8:30-10:30**

**MACHINE TRANSLATION (pages 148-177)**

Chair: Gary Martins, Intelligent Software Inc.

*Investigating the possibility of a microprocessor-based machine translation system*

Harold L. Somers, University of Manchester

*An application of Montague grammar to English-Japanese machine translation*

Toyoaki Nishida and Shuji Doshita, Kyoto University

*A status report on the LRC machine translation system*

Jonathan Slocum, Siemens Corporation

*Computer assisted translation systems: the standard design and a multi-level design*

Alan K. Melby, Brigham Young University

**11:00-noon**

**SPEECH INTERFACES (pages 178-197)**

Chair: Douglas L. Hogan, Consultant

*Interactive natural language processing: a pragmatic approach*

A. Biermann, R. Rodman, B. Ballard, T. Betancourt, G. Bilbro, H. Deas, L. Fineman, P. Fink, D. Gregory, K. Gilbert, and F. Heidlage; Duke University and North Carolina State University

*Application of the Liberman-Prince stress rules to computer synthesized speech*

David L. McPeters, Bell Laboratories; and Alan L. Tharp, North Carolina State University

**noon-2:00 LUNCHEON**

GUEST SPEAKER: Martin Kay, Xerox Palo Alto Research Center

**2:00-3:00**

**PANEL: THE IMPACT OF NATURAL LANGUAGE ACCESS ON DATABASE DESIGN AND IMPLEMENTATION (page 198)**

Chair: S. Jerrold Kaplan, Teknowledge

Panelists: Jeffrey Hill, Artificial Intelligence Corporation

Francisco Corella, Symantec

Jim Davidson, Stanford University

Steven Schwartz, Cognitive Systems, Inc.

Robert Wilensky, University of California at Berkeley

**4:00-5:30**

**TEXT ANALYSIS-Session 2 (pages 132-147)**

Chair: Donald E. Walker, SRI International

**Using natural language descriptions to improve the usability of databases**  
Carole D. Hafner and John D. Joyce, General Motors Research Laboratories

**Natural language text segmentation techniques applied to the automatic compilation of printed subject indexes and for online database access**  
George Vladutz, Institute for Scientific Information

**Automatic representation of the semantic relationships corresponding to a French surface expression**  
Gian Piero Zarri, Centre National de la Recherche Scientifique

**Thursday, 3 February 1983**

**8:30-10:00**

**DOMAIN INDEPENDENT NATURAL LANGUAGE INTERFACES—Session 2 (pages 31-53)**  
Chair: Aravind K. Joshi, University of Pennsylvania

**IR-NLI: an expert natural language interface to online data bases**  
Giovanni Guida and Carlo Tasso, Universita di Udine

**TEAM, a transportable natural language interface system**  
Barbara J. Gross, SRI International

**Isolating domain dependencies in natural language interfaces**  
R. Grishman, New York University and Navy Center for Applied Research in AI; L. Hirschman, Burroughs Corporation; and C. Friedman, New York University Linguistic String Project

**10:30-noon**

**KNOWLEDGE BASED APPROACHES—Session 2 (pages 69-88)**  
Chair: Ivan A. Sag, Stanford University

**Exploring a natural language processing system for oil exploration**  
Wendy L. Lehnert, University of Massachusetts; and Steven P. Schwartz, Cognitive Systems, Inc.

**Knowledge based question answering**

Michael J. Pazzani and Carl Engelman, The MITRE Corporation

**How to drive a database front end using general semantic information**  
B. K. Bolzurakov and K. Sparck Jones, University of Cambridge

**noon-1:30 LUNCHEON**

**1:30-3:00**

**PANEL SUMMARY AND RECOMMENDATIONS**

Chair: Iris M. Kameny, System Development Corporation  
Panelists: Jude Franklin, Navy Center for Applied Research in AI  
Douglas L. Hogan, Consultant  
Aravind K. Joshi, University of Pennsylvania  
Martin Kay, Xerox Palo Alto Research Center  
Gary Martins, Intelligent Software Inc.  
Ivan A. Sag, Stanford University  
Donald E. Walker, SRI International  
Ralph M. Weischedel, University of Delaware

## TABLE OF CONTENTS

### DOMAIN-INDEPENDENT NATURAL LANGUAGE INTERFACES

<i>Introduction</i>	
Aravind K. Joshi . . . . .	1
<i>Problems in natural language interface to DBMS with examples from EUFID</i>	
Marjorie Templeton and John Burger . . . . .	3
<i>Introducing ASK, a simple knowledgeable system</i>	
Bozena H. Thompson and Frederick B. Thompson . . . . .	17
<i>A robust portable natural language data base interface</i>	
Jerrold M. Ginsparg . . . . .	25
<i>IR-NLI: an expert natural language interface to online data bases</i>	
Giovanni Guida and Carlo Tasso . . . . .	31
<i>TEAM, a transportable natural language interface system</i>	
Barbara J. Grosz . . . . .	39
<i>Isolating domain dependencies in natural language interfaces</i>	
R. Grishman, L. Hirschman, and C. Friedman . . . . .	46

### KNOWLEDGE-BASED APPROACHES

<i>Introduction</i>	
Ivan A. Sag . . . . .	54
<i>Distinguishing fact from opinion and events from meta-events</i>	
Christine A. Montgomery . . . . .	55
<i>Parsing with logical variables</i>	
Timothy W. Finin and Martha Stone Palmer . . . . .	62
<i>Explorer: a natural language processing system for oil exploration</i>	
Wendy G. Lehnert and Steven P. Shwartz . . . . .	69
<i>Knowledge based question answering</i>	
Michael J. Pazzani and Carl Engelman . . . . .	73
<i>How to drive a database front end using general semantic information</i>	
B. K. Boguraev and K. Sparck Jones . . . . .	81

### HANDLING ILL-FORMED INPUT

<i>Introduction</i>	
Ralph M. Weischedel . . . . .	89
<i>The 'fitted' parse: 100% parsing capability in a syntactic grammar of English</i>	
Karen Jensen and George E. Heidorn . . . . .	93
<i>Utilizing domain-specific information for processing compact text</i>	
Elaine Marsh . . . . .	99

<i>Scruffy text understanding: design and implementation of the NOMAD system</i>	
Richard H. Granger, Chris J. Staros, Gregory B. Taylor, and Rika Yoshii . . . . .	104

## TEXT ANALYSIS

<i>Introduction</i>	
Donald E. Walker . . . . .	107
<i>Specialized information extraction: automatic chemical reaction coding from English descriptions</i>	
Larry H. Reeker, Elaine M. Zamora, and Paul E. Blower . . . . .	109
<i>Automatic analysis of descriptive texts</i>	
James R. Cowie . . . . .	117
<i>'Expertness' from structured text? RECONSIDER: a diagnostic prompting program</i>	
Mark S. Tuttle, David D. Sherertz, Marsden S. Blois, and Stuart Nelson . . . . .	124
<i>Using natural language descriptions to improve the usability of databases</i>	
Carole D. Hafner and John D. Joyce . . . . .	132
<i>Natural language text segmentation techniques applied to the automatic compilation of printed subject indexes and for online database access</i>	
George Vladutz . . . . .	136
<i>Automatic representation of the semantic relationships corresponding to a French surface expression</i>	
Gian Piero Zarri . . . . .	143

## MACHINE TRANSLATION

<i>Introduction</i>	
Gary Martins . . . . .	148
<i>Investigating the possibility of a microprocessor-based machine translation system</i>	
Harold L. Somers . . . . .	149
<i>An application of Montague grammar to English-Japanese machine translation</i>	
Toyoaki Nishida and Shuji Doshita . . . . .	156
<i>A status report on the LRC machine translation system</i>	
Jonathan Slocum . . . . .	166
<i>Computer assisted translation systems: the standard design and a multi-level design</i>	
Alan K. Melby . . . . .	174

## SPEECH INTERFACES

<i>Introduction</i>	
Douglas L. Hogan . . . . .	178
<i>Interactive natural language processing: a pragmatic approach</i>	
A. Biermann, R. Rodman, B. Ballard, T. Betancourt, G. Bilbro, H. Deas, L. Fineman, P. Fink, D. Gregory, K. Gilbert, and F. Heidlage . . . . .	180
<i>Application of the Liberman-Prince stress rules to computer synthesized speech</i>	
David L. McPeters and Alan L. Tharp . . . . .	192

**PANEL: THE IMPACT OF NATURAL LANGUAGE ACCESS ON DATABASE  
DESIGN AND IMPLEMENTATION**

*Introduction*  
S. Jerrold Kaplan . . . . . 198
