Proceedings of the Workshop on Computational Lexical Semantics

Held in cooperation with HLT-NAACL 2004

May 6, 2004 Boston, Massachusetts, USA

Order additional copies from:

Association for Computational Linguistics 3 Landmark Center East Stoudsburg, PA 18301, USA Tel: +1-570-476-8006 Fax: +1-570-476-0860 acl@aclweb.org

SPONSOR:

Language Computer Corporation, Dallas, TX

KEYNOTE SPEAKER:

Dr. Ray Jackendoff, Brandeis University, USA

PROGRAM COMMITTEE:

Dan Moldovan	The University of Texas at Dallas, USA	Program Co-Chair
Roxana Girju	Baylor University, USA	Program Co-Chair
Jade Goldstein	DoD, USA	
Vasileios Hatzivassiloglou	Columbia University	
Marti Hearst	U.C. Berkeley, USA	
Mirella Lapata	University of Sheffield, UK	
Steve Maiorano	ATP, USA	
Martha Palmer	University of Pennsylvania, USA	
John Prange	ARDA, USA	
James Pustejovsky	Brandeis University, USA	
Carol Van Ess-Dykema	DoD, USA	

Additional Reviewers

Adriana Badulescu	The University of Texas at Dallas, USA
Sasha Blair-Goldensohn	Columbia University, USA
Orest Bolohan	The University of Texas at Dallas, USA
Elena Filatova	Columbia University, USA
Ovidiu Fortu	The University of Texas at Dallas, USA
Ana-Maria Giuglea	The University of Texas at Dallas, USA
Adrian Novischi	The University of Texas at Dallas, USA
Marian Olteanu	The University of Texas at Dallas, USA
Marta Tatu	The University of Texas at Dallas, USA
Simone Teufel	University of Cambridge, UK

PREFACE

We are pleased to present the papers accepted for the Computational Lexical Semantics Workshop (CLS-04), held in conjunction with the HLT-NAACL 2004 Conference in Boston, MA, May 2-7, 2004. CLS-04 continues the tradition begun over a decade ago.

The aim of this workshop was to bring together researchers from academia, government, and industry interested in text understanding, lexical semantics, knowledge representation, question answering, information retrieval, machine translation, and speech processing to report on recent advances and new perspectives in computational lexical semantics. We believe we have accomplished this goal and are excited about the future advances in lexical semantics.

Lexical semantics is the study of word semantic properties in context and it is at the core of NLP and many of its applications. Recently, there has been a renewed interest in text semantics fueled in part by the complexity of some major research initiatives, such as Question Answering, Text Summarization, Machine Translation, Information Extraction, Reasoning, and others.

We are honored to have Dr. Ray Jackendoff as the keynote speaker for this year's workshop. Professor Jackendoff's research deals with the semantics of natural language, its bearing on the formal structure of cognition, and its lexical and syntactic expression. We would like to express our sincere appreciation to him for having kindly agreed to share his unique perspective with this workshop.

We would like to take this opportunity to extend our gratitude to the many people who contributed to CLS-04. We would like to thank HLT-NAACL 2004 General Chair, Julia Hirschberg, Publications Chairs Gina-Anne Levow and Miles Osborne and Workshop Chair Richard Sproat for their support and assistance. Our special thanks to the program committee and additional reviewers, as listed on the previous page, for their contributions of time, conscientious effort, support and encouragement. Highest appreciation goes to all the researchers who contributed their work to CLS-04. We are greatful to Cathie Ranta and Marta Tatu from the Human Language Technology Research Institute, University of Texas at Dallas, who have assisted with the preparation of this volume. We would also like to extend an additional acknowledgment to Language Computer Corporation, Dallas, TX, for its kind, generous co-sponsorship of this year's workshop.

Welcome to the workshop!

Dan Moldovan and Roxana Girju Program Committee Co-Chairs March 2004

Table of Contents

OntoSem Methods for Processing Semantic Ellipsis Marjorie McShane, Stephen Beale and Sergei Nirenburg1	
Towards Full Automation of Lexicon Construction Richard Rohwer and Dayne Freitag 9	
A Powerful and General Approach to Context Exploitation in Natural Language Processing Robert W. Means, Syrus C. Nemat-Nasser, Adrian T. Fan and Robert Hecht-Nielsen	
Using prepositions to extend a verb lexicon Karin Kipper, Benjamin Snyder and Martha Palmer	
Using Selectional Profile Distance to Detect Verb Alternations Vivian Tsang and Suzanne Stevenson	
Extended Lexical-Semantic Classification of English Verbs Anna Korhonen and Ted Briscoe	
Non-Classical Lexical Semantic Relations Jane Morris and Graeme Hirst46	
Decision Trees for Sense Disambiguation of Prepositions: Case of Over Yukiko Sasaki Alam	
Models for the Semantic Classification of Noun Phrases Dan Moldovan, Adriana Badulescu, Marta Tatu, Daniel Antohe and Roxana Girju60	
Support Vector Machines Applied to the Classification of Semantic Relations in Nominalized Noun Phrases Roxana Girju, Ana-Maria Giuglea, Marian Olteanu, Ovidiu Fortu, Orest Bolohan and Dan Moldovan 68	
Abstraction Summarization for Managing the Biomedical Research Literature Marcelo Fiszman, Thomas C. Rindflesch and Halil Kilicoglu	
Comparing, Integrating Lexical Definitional Knowledge From Multiple Sources Lucja M. Iwanska	
Generating Linear Orders of Text-Based Events Kathleen Hornsby and Suzannah Hall	
Fine-Grained Lexical Semantic Representations and Compositionally-Derived Events in Mandarin Chi-	
nese Jimmy Lin	

WORKSHOP PROGRAM

Thursday, May 6

8:30-9:30 9:30-9:40	Keynote speech: TBA (Dr. Ray Jackendoff) Coffee break
9:40-10:00	OntoSem Methods for Processing Semantic Ellipsis Marjorie McShane, Stephen Beale and Sergei Nirenburg
10:00-10:20	Towards Full Automation of Lexicon Construction Richard Rohwer and Dayne Freitag
10:20-10:40	A Powerful and General Approach to Context Exploitation in Natural Language Processing Robert W. Means, Syrus C. Nemat-Nasser, Adrian T. Fan and Robert Hecht-Nielsen
10:40-11:10	Coffee break
11:10-11:30	Using prepositions to extend a verb lexicon Karin Kipper, Benjamin Snyder and Martha Palmer
11:30-11:50	Using Selectional Profile Distance to Detect Verb Alternations Vivian Tsang and Suzanne Stevenson
11:50-12:10	Extended Lexical-Semantic Classification of English Verbs Anna Korhonen and Ted Briscoe
12:10-1:30	Lunch
1:30-1:50	Non-Classical Lexical Semantic Relations Jane Morris and Graeme Hirst
1:50-2:10	Decision Trees for Sense Disambiguation of Prepositions: Case of Over Yukiko Sasaki Alam
2:10-2:30	Models for the Semantic Classification of Noun Phrases Dan Moldovan, Adriana Badulescu, Marta Tatu, Daniel Antohe and Roxana Girju
2:30-2:40	Coffee break
2:40-3:00	Support Vector Machines Applied to the Classification of Semantic Relations in Nominalized Noun Phrases Roxana Girju, Ana-Maria Giuglea, Marian Olteanu, Ovidiu Fortu, Orest Bolohan and Dan Moldovan
3:00-3:20	Abstraction Summarization for Managing the Biomedical Research Literature Marcelo Fiszman, Thomas C. Rindflesch and Halil Kilicoglu
3:20-3:40	Comparing, Integrating Lexical Definitional Knowledge From Multiple Sources Lucja M. Iwanska
3:40-4:10	Coffee break
4:10-4:30	Generating Linear Orders of Text-Based Events Kathleen Hornsby and Suzannah Hall
4:30-4:50	Fine-Grained Lexical Semantic Representations and Compositionally-Derived Events in Mandarin Chinese Jimmy Lin
4:50-5:30	Discussion panel
