

APPENDIX F:

FINAL TEST SCORE SUMMARIES

The tables in this appendix are the summary score reports produced by the scoring program. For information on the format of these reports, see the paper by Nancy Chinchor on the evaluation metrics in Part I of this proceedings. For information on the distinction between the tables labeled "scores-max-tradeoff.tst2" (which are for the required test runs) and the remaining tables (which are for the optional test runs), see appendix B on the test procedures. For specific information on the test setups for the optional runs, see the papers in Part II by the individual sites.
