COMPUTERM 2002: Second International Workshop on Computational Terminology

- Alan M. Buckeridge, Richard F. E. Sutcliffe: **Disambiguating Noun Compounds with Latent Semantic Indexing**

- Michael Carl, Philippe Langlais: **An Intelligent Terminology Database as a Pre-processor for Statistical Machine Translation**

- Natalia Grabar, Pierre Zweigenbaum: **Lexically-Based Terminology Structuring: Some Inherent Limits**

- Oi Yee Kwong, Benjamin K. Tsou, Tom B.Y. Lai, Robert W. P. Luk, Lawrence Y. L. Cheung, Francis C. Y. Chik: **Alignment and Extraction of Bilingual Legal Terminology from Context Profiles**

- Philippe Langlais: **Improving a general-purpose Statistical Translation Engine by Terminological lexicons**

- Yi-Chung Lin, Peng-Hsiang Hung: **Probabilistic Named Entity Verification**

- Hiroshi Nakagawa, Tatsunori Mori: **A Simple but Powerful Automatic Term Extraction Method**

- Goran Nenadić, Irena Spasić, Sophia Ananiadou: **Automatic Discovery of Term Similarities Using Pattern Mining**

- Koichi Takeuchi, Kyo Kageura, Teruo Koyama: **An LCS-Based Approach for Analyzing Japanese Compound Nouns with Deverbal Heads**

- Noriko Tomuro: **Question Terminology and Representation for Question Type Classification**

- Kazuhide Yamamoto: **Acquisition of Lexical Paraphrases from Texts**
