Acknowledgments

VLSP 2025 is hosted by the Vietnam Institute for Advanced Study in Mathematics (VIASM) in conjunction with the Association for Vietnamese Language and Speech Processing (VLSP).

This event is sponsored by AI Hay and Vingroup Innovation Foundation (VINIF - VINBIGDATA).

Foreword

The 11th International Workshop on Vietnamese Language and Speech Processing (VLSP 2025) was hosted at the Vietnam Institute for Advanced Study in Mathematics (VIASM), Hanoi, Vietnam, on October 29–30, 2025. Continuing the tradition established since its inception, VLSP serves as the primary scientific forum for researchers, developers, and practitioners to exchange ideas and advance the state of the art in Vietnamese language and speech technologies.

Since VLSP 2016, the workshop has been composed of two main components: a scientific track featuring peer-reviewed research papers and software demonstrations, and an evaluation campaign offering shared tasks on Vietnamese text and speech processing. This structure reflects the dual goals of VLSP - to foster academic research and to strengthen the development of high-quality language and speech resources for the Vietnamese language. Beginning in 2020, VLSP workshops have been officially organized under the Association for Vietnamese Language and Speech Processing, a chapter of the Vietnam Association for Information Processing.

The VLSP 2025 edition, held in conjunction with the 18th International Conference on Natural Language Generation (INLG 2025), continues this mission through an ambitious evaluation campaign comprising eleven shared tasks. These include challenges on Speech Quality Assessment, Automatic Speech Recognition and Speech Emotion Recognition, Spoofing-Aware Speaker Verification, Voice Conversion, Deep Retrieval in the expansive Legal Landscape (DRiLL), Vietnamese Legal Small Language Models (Legal-SLM), Numerical Reasoning Question Answering, Temporal Question Answering, Semantic Parsing, Medical Domain Machine Translation with Limited-Pretraining Models, and Multimodal Legal Question Answering on Traffic Sign Rules. These shared tasks not only promote methodological innovation but also contribute to building valuable benchmark datasets for the VLSP community.

VLSP 2025 was organized by the Association for Vietnamese Language and Speech Processing (a chapter of the Vietnam Association for Information Processing). The organizers would like to extend their sincere gratitude to Hanoi University of Science and Technology (HUST), the Japan Advanced Institute of Science and Technology (JAIST), NamiTech, the National Institute of Informatics (NII, Japan), Ton Duc Thang University (TDTU), Thuyloi University (TLU), Vbee, Vietlex, VNU University of Science (VNU-HUS), VNU University of Engineering and Technology (VNU-UET), VNU University of Law (VNU-UL), and VNUHCM University of Information Technology (VNUHCM-UIT) for their collaboration in co-organizing the workshop and in constructing the datasets for the eleven shared tasks. The organizers are also deeply grateful to AI Hay and the Vingroup Innovation Foundation (VinIF) for their generous sponsorship, and to Int2, AIHub.ML, and the University of Science and Technology of Hanoi (USTH) for hosting and supporting the operation of the VLSP 2025 challenges and website.

We hope that the proceedings of VLSP 2025 will provide readers with valuable insights into current advances in Vietnamese language and speech processing and will continue to inspire future research and collaboration within this growing community.

Luong Chi Mai
Nguyen Thi Minh Huyen
Nguyen Thi Thu Trang

VLSP 2025 Chairs

Organizers

General Co-chairs

Nguyen Thi Minh Huyen, VNU University of Science, Hanoi, Vietnam

Nguyen Thi Thu Trang, Hanoi University of Science and Technology, Vietnam

Organizing Co-chairs

Le Anh Cuong, Ton Duc Thang University, Ho Chi Minh City, Vietnam

Nguyen Viet Cuong, Intelligent Integration Co., Ltd., Vietnam

Do Van Hai, Thuy Loi University, Hanoi, Vietnam

Nguyen Van Kiet, University of Information Technology, VNU Ho Chi Minh City, Vietnam

Le Hong Phuong, VNU University of Science, Hanoi, Vietnam

Le Hoang Quynh, VNU University of Engineering and Technology, Hanoi, Vietnam

Vu Xuan Son, Umeå University, Sweden

Nguyen Van Vinh, VNU University of Engineering and Technology, Hanoi, Vietnam

Local Organizing Co-chairs

Ha My Linh, VNU University of Science, Hanoi, Vietnam

Ngo The Quyen, VNU University of Science, Hanoi, Vietnam

Program Committee Co-chairs

Luong Chi Mai, Institute of Information Technology, VAST, Vietnam

Nguyen Le Minh, Japan Advanced Institute of Science and Technology (JAIST), Japan

Table of Contents

Automatic Speech Recognition and Speech Emotion Recognition (ASR/SER)

VLSP 2025 ASR/SER: Vietnamese Speech Recognition and Speech Emotion Recognition Challenge: Technical Analysis and Insights	2
<i>Manh Hai Cao and Chi Dung Hoang and Quang Trung Le and Van Hai Do</i>	
Speech recognition and speech emotion recognition approach for VLSP 2025	7
<i>Bui Tien Dat and Nguyen Duy Khanh</i>	
Twinkle-ASR: A lightweight and sufficient framework for the ASR shared task at VLSP 2025	14
<i>Dang Nguyen Pham and Viet Tien Pham and Minh Nghia Vu and Minh Nguyen Le</i>	
A Comprehensive Pipeline for Vietnamese Speech Recognition and Emotion Recognition	23
<i>Hy Nguyen Thien</i>	
VLSP 2025 ASR-SER - From Data Exploration to Model Training: A Strategic Approach	28
<i>Nhat Minh Nguyen and Ngoan Pham Van</i>	
DFAT: Dual-stage Fusion of Acoustic and Text feature for Speech Emotion Recognition	36
<i>Nhi Nguyen Yen Truong and Sang Le Quang and Huy Tran Quang and Tri Pham Xuan and Duong Tran Ham and Binh Tran Le Hai and Tin Huynh and Kiem Hoang</i>	

Speech Quality Assessment (SQA)

VLSP 2025 Shared Task: Speech Quality Assessment for Vietnamese Telecommunication	46
<i>Bao Thang Ta and Minh Tu Le and Quang Trung Le and Van Hai Do</i>	
Multi-Source Fine-Tuning of Self-Supervised Models for Vietnamese Speech Quality Assessment	53
<i>Thuc Huu Tran</i>	
EM-VSQA: Enhancing VLSP Speech Quality Assessment with External Data and Multi-Task Learning	62
<i>Tri Dung Do</i>	

Spoofing-Aware Speaker Verification (VSASV)

The Vietnamese Spoofing-aware Speaker Verification Challenge 2025: Summary and Results	71
<i>Phuong Tuan Dat and Hoang Long Vu and Nguyen Thi Thu Trang</i>	
SVBK System Description to the VLSP 2025 Challenge on Vietnamese Spoofing-Aware Speaker Verification	78
<i>Nguyen Tran Trung and To Duy An and Chu Hoang Viet</i>	
SV++'s Vietnamese Spoofing-Aware Speaker Verification Systems for VLSP 2025	82
<i>Pham Viet Hoang and Ho Bao Thu and Ha Viet Khanh</i>	

Voice Conversion (VVC)

The 2025 VLSP Task on Vietnamese Voice Conversion: Overview and Preliminary Results	90
<i>Nguyen Thi Thu Trang and Huu Tuong Tu and Le Hoang Anh Tuan</i>	
ViettelRoar: Voice conversion approach for VLSP 2025	99
<i>Hong Nhat Tran and Tung Luong Nguyen and Thanh Hai Tran</i>	

Twinkle-VC: A Robust and High-Quality Zero-Shot Voice Conversion System for the VLSP 2025 Shared Task	104
<i>Minh Nghia Vu and Viet Tien Pham and Dang Nguyen Pham and Minh Nguyen Le</i>	
Deep Retrieval in the expansive Legal Landscape (DRiLL)	
DRILL Shared Task 2025: The Challenge of Deep Retrieval in the Expansive Legal Landscape . .	113
<i>Thi-Hai-Yen Vuong and Tan-Minh Nguyen and Hoang-Trung Nguyen and Trong-Khoi Dao and Ha-Thanh Nguyen and Hoang-Quynh Le</i>	
ViDRILL: A Multi-Stage Retrieval Framework for Vietnamese Legal Document Search	120
<i>Dien X. Tran and Tai D. Truong and Kien C. Nguyen</i>	
Data Augmentation and Hierarchical Chunking for Deep Retrieval in the Expansive Legal Landscape	127
<i>Le Ba Hoai and Dinh Van Hung and Tran Bao Hieu</i>	
EDM Team’s Approach in DRiLL@VLSP 2025: A Multi-Stage End-to-End Architecture for Deep Retrieval in the expansive Legal Landscape	132
<i>Tien Duy Pham and Huu Dong Nguyen and The Ngoc Phung</i>	
DRiLL at VLSP 2025: A Simple Two-Stage Retrieval Framework for Vietnamese Legal Document Retrieval	140
<i>Xuan Duong Hieu and Thanh Dat Do</i>	
Vietnamese Legal Small Language Models (LegalSLM)	
Overview of the LegalSLM Shared Task: Evaluating Legal Reasoning of Vietnamese Small Language Models	147
<i>Anh-Cuong Le and Trong-Chi Duong and Viet-Ha Nguyen and Thang VQ Le</i>	
Bosch@AI_Team at LegalSML 2025: Vietnamese Legal Small Language with Domain Adaptation and Aspect-based Data Synthesis	153
<i>Tran Minh Quang and Nguyen Xuan Phi and Nguyen Van Tai and Phan Minh Toan and Dang Van Thin</i>	
Can Small Language Models Handle Vietnamese Legal Reasoning? Insights from Multi-Task Evaluation	165
<i>Long S. T. Nguyen and Hung C. Luu and Quynh T. N. Vo and Hy N. G. La and Hoai M. Tran and Anh T. D. Dinh and Tuan H. Nguyen and Tri N. Ho and Tho T. Quan</i>	
MinLegal at VLSP2025-LegalSLM: A Two-Stage LoRA-to-Full Fine-tuning Approach for Vietnamese Legal Small Language Models	179
<i>Ngo Dinh Luan and Kiet Nguyen Van</i>	
Numerical Reasoning Question Answering (NumQA)	
VLSP 2025 challenge: Numerical Reasoning Question and Answer	187
<i>Le Ngoc Toan and Ha My Linh and Pham Thi Duc and Ngo The Quyen and Nguyen Thi Minh Huyen</i>	
Enhancing Numerical Reasoning in Vietnamese Financial Question Answering through Program-Centric Policy Optimization	197
<i>Duc Dinh Chu and Thanh-Bac Nguyen Ba and Duy Dinh Le and Khanh Van Tran</i>	
MoFin: A Small Vietnamese Language Model for Financial Reasoning via Reinforcement Learning	205
<i>Nguyen Khac Duy and Vo Quang Tri and Le Ho Bao Nhat and Dinh Cong Huy Hoang and Ngo Quang</i>	

Huy and Huy Tien Nguyen

Two-Stage Training with Reinforcement Learning for Vietnamese Financial Numerical Reasoning 214
Nhat-Truong Dinh and Thanh-Trung Ngo and Quoc-Bao Trinh and Duc-Vu Nguyen

A Graph-Based Agent Approach to Numerical Reasoning Question Answering 223
Vu Thanh Dat Ha and Quang Nguyen and Thanh Tuan Le and Huan Vu

Semantic Parsing (viSemParse)

VLSP 2025 challenge: Vietnamese Semantic Parsing 241
Ha My Linh and Pham Thi Duc and Le Ngoc Toan and Nguyen Thi Minh Huyen

ViAMR: Fine-tuning LLMs for Abstract Meaning Representation in Vietnamese 250
Dien X. Tran and Nhon T. Vo and Kien C. Nguyen

VLSP 2025 Shared Task: A Seq2Seq Transformer Approach to Vietnamese Semantic Parsing . . . 259
Giang Huynh Thi Ha and Thang Nguyen Kien Bao and Tam Vo Minh

ViSemCrew: Divide and Conquer Vietnamese Semantic Parsing Through Multi-Agent Intelligence 267
Hao Phu Phan and Khiem Vinh Tran

An Empirical Study of Large Language Models for Vietnamese Abstract Meaning Representation Parsing 279
Nhat-Truong Dinh and Thanh-Trung Ngo and Quoc-Bao Trinh and Duc-Vu Nguyen

Temporal Question Answering (TempQA)

VLSP 2025 Shared Task: Vietnamese Temporal Question Answering (TemporalQA) 289
Pham Thi Duc and Ha My Linh and Le Ngoc Toan and Nguyen Thi Minh Huyen

Enabling Temporal Commonsense in Vietnamese LLMs – Date-Arith and DurationQA 300
Duc Dinh Chu and Thanh-Bac Nguyen Ba and Duy Dinh Le and Khanh Van Tran

Retrieval-Guided Fine-tuning for Vietnamese Event Duration Question Answering 306
Duong Nguyen Dao and Thanh Xuan Nguyen

UIT-NTTT at VLSP2025: A Prompt Engineering Approach for Date Arithmetic Reasoning in Vietnamese 316
Khoa Nguyen-Anh Le and Dang Van Thin

Robust Vietnamese Duration Question Answering through LoRA-based Ensemble and Adaptive Threshold Calibration 326
Le Tuan Anh and Do Quang Dung and Do Tien Dung and Vu Minh Dang and Ho Tu Minh

Robust Vietnamese Date-Arithmetic Question Answering through QDoRA Fine-Tuning and Canonicalized Decoding 336
Le Tuan Anh and Do Quang Dung and Do Tien Dung and Vu Minh Dang and Ho Tu Minh

Evaluating LLMs on Vietnamese Duration Question Answering 348
Nhat-Truong Dinh and Thanh-Trung Ngo and Quoc-Bao Trinh and Duc-Vu Nguyen

DP-Ens DurationQA: Dual-Prompt Fine-Tuning with Log-Probability Ensemble for Duration Question Answering 354
Van Thai Le and Ngoc Bui Lam Quang and Dong Duy Nguyen

Decoupling Reasoning from Language: A Hybrid Architecture for Temporal Reasoning in Vietnamese	362
<i>Xuan-Truong Quan and Duc Do Minh and Dat Nguyen-Tat and Xuan-Son Quan and Vinh Nguyen Van</i>	
Medical Domain Machine Translation with Limited-Pretraining Models (MMT-LPM)	
MT Shared Task 2025: Medical domain Machine Translation with Limited-Pretraining models . .	371
<i>Tran Hong Viet and Nguyen Tien Khoi and Tran Duy Long and Nguyen Minh Quy and Nguyen Van Vinh</i>	
Vietnamese–English Medical Domain Machine Translation with LLMs and GRPO Optimization Using Verified Rewards	377
<i>Dang Sy Duy and Nguyen Duy Chien and Chu Ngoc Vuong</i>	
Bilingual English-Vietnamese Medical Translation Model	388
<i>Long Phung Hoang and Tuyen Nguyen The</i>	
Bosch@AI_Team at MMT 2025: Medical Machine Translation by Bidirectional Training with Small Language Models	393
<i>Phan Minh Toan and Nguyen Xuan Phi and Nguyen Van Tai and Trang Minh Quang and Dang Van Thin</i>	
Multimodal Legal Question Answering on Traffic Sign Rules (MLQA-TSR)	
VLSP 2025 MLQA-TSR Challenge: Vietnamese Multimodal Legal Question Answering on Traffic Sign Regulation	402
<i>Son T.Luu and Trung Vo and Hiep Nguyen and Khanh Quoc Tran and Kiet Van Nguyen and Vu Tran and Ngan Luu-Thuy Nguyen and Le-Minh Nguyen</i>	
Reading the Signs: A Graph-Based System for Multimodal Information Retrieval on Vietnamese Traffic Law	410
<i>Hieu Minh Huynh and An Nguyen Tran Khuong and Dai Phan Trong and Tin Van Huynh</i>	
Metamorphic at VLSP 2025: SIGMA - A Multimodal Agent System for Legal QA on Vietnamese Traffic Signs	418
<i>Nguyen Tuan Kiet and Nguyen Khanh Tuan Anh and Long Hoang Huu Nguyen and Dam Vu Trong Tai and Dang Van Thin</i>	
A Hybrid Dual-Branch Retrieval and Chain-of-Thought Reasoning Framework for Multimodal Legal Question Answering	431
<i>Nguyen Van Tien and Mong The Luc and Han Huu Dang</i>	
LexiSignVQA: A Unified Training-free Multi-stage Approach to Multimodal Legal Question Answering on Traffic Sign Rules	440
<i>Phung Xuan Pham and Duc Quang Le and Tuan Hau Tran and Thinh Nguyen-Truong Huynh</i>	
A low-cost low-energy approach to VQA on traffic signs problems	451
<i>Vu Dinh Anh and Khiem Vinh Tran and Tran Thi Ha</i>	
Prompting Beyond Pixels: A Training-Free and Retrieval-Enhanced Paradigm for Traffic Question Answering	459
<i>Vu Thanh Dat Ha and Tuan Huy Tran and Ngoc Chien Chu and Duc Hao Pham and Huan Vu</i>
