## PREFACE

This volume contains the papers presented at the HLT/NAACL 2004 workshop entitled: Scalable Natural Language Understanding. The workshop was held on May 6th, 2004 and is the second in a series that started in Heidelberg, Germany on May 23rd and 24th 2002. The papers were refereed by an international panel of experts in the field.

The workshop is the first held under the auspices of the HLT/NAACL to be directed at issues concerning the scalability of natural language understanding and generation systems. There is a growing need for systems that can understand and generate natural language in applications that require substantial amounts of knowledge as well as reasoning capabilities. Most current implemented systems for natural language understanding (NLU) are decoupled from any reasoning processes, which makes them narrow and brittle.

Furthermore, they do not appear to be scalable in the sense that the techniques used in such systems do not appear to generalize to more complex applications. While significant work has been done in developing theoretical underpinnings of systems that use knowledge and reasoning (e.g., development of models of linguistic interpretation using abductive reasoning, intention recognition, formal models of dialogue, formal models of lexical and utterance meaning, and utterance planning), it has often proved difficult to utilize such theories in robust working systems.

Another major barrier has been the vast amount of linguistic and world knowledge needed. But there is now significant progress in compiling the required knowledge, using manual, statistical and hybrid techniques. But even as these resources become available, we still lack some key conceptual and computational frameworks that will form the foundation for effective scalable natural language systems.

The collection of researchers who face the challenges involved in scaling human language technology is growing, as well as a greater effort to develop systems that robustly interact with users in intuitive and conversational ways.

We wish to thank the members of the Program Committee for reviewing the submissions on a very tight schedule.

*James Allen*, University of Rochester  
*Jerome Feldman*, International Computer Science Institute  
*Rainer Malaka*, European Media Laboratory, GmbH  
*Johanna Moore*, University of Edinburgh  
*Robert Porzel*, European Media Laboratory, GmbH

**WORKSHOP CO-CHAIRS:**

James Allen, Rochester, Chair

Jerry Feldman, Berkeley, Chair

Rainer Malaka, Heidelberg, Chair

Johanna Moore, Edinburgh, Chair

Robert Porzel, Heidelberg, Chair

**PROGRAM COMMITTEE:**

Jan Alexandersson, German Research Center for Artificial Intelligence

Jaime Carbonell, Carnegie Mellon University

Dan Gildea, University of Rochester

Sanda Harabagiu, Southern Methodist University

Martha Palmer, University of Pennsylvania

Stanley Peters, Stanford University

Massimo Poesio, University of Essex

Carolyn Penstein Rose, Carnegie Mellon University

Matthew Stone, Rutgers University

## Table of Contents

<i>Robustness versus Fidelity in Natural Language Understanding</i> Mark G. Core and Johanna D. Moore .....	1
<i>Towards Measuring Scalability in Natural Language Understanding Tasks</i> Robert Porzel and Rainer Malaka .....	9
<i>A Little Goes a Long Way: Quick Authoring of Semantic Knowledge Sources for Interpretation</i> Carolyn Penstein Rosé and Brian S. Hall .....	17
<i>Ends-based Dialogue Processing</i> Jan Alexandersson, Tilman Becker, Ralf Engel, Markus Löckelt, Elsa Pecourt, Peter Poller, Norbert Pfeleger and Norbert Reithinger .....	25
<i>Scalable Construction-Based Parsing and Semantic Analysis</i> John Bryant .....	33
<i>Scaling Understanding up to Mental Spaces</i> Eva Mok, John Bryant and Jerome Feldman .....	41
<i>Different Sense Granularities for Different Applications</i> Martha Palmer, Olga Babko-Malaya and Hoa Trang Dang .....	49
<i>Making Relative Sense: From Word-graphs to Semantic Frames</i> Robert Porzel, Berenike Loos and Vanessa Micelli .....	57
<i>HYPERBUG: A Scalable Natural Language Generation Approach</i> Martin Klarner .....	65

## WORKSHOP PROGRAM

**Thursday, May 6, 2004**

- 09:00-9:15     *Welcome*
- 09:15-09:45    *Robustness versus Fidelity in Natural Language Understanding*  
Mark G. Core and Johanna D. Moore
- 09:45-10:15    *Towards Measuring Scalability in Natural Language Understanding Tasks*  
Robert Porzel and Rainer Malaka
- 10:15-11:00    *Break*
- 11:00-11:30    *A Little Goes a Long Way: Quick Authoring of Semantic Knowledge Sources  
for Interpretation*  
Carolyn Penstein Rosé and Brian S. Hall
- 11:30-12:00    *Ends-based Dialogue Processing*  
Jan Alexandersson, Tilman Becker, Ralf Engel, Markus Löckelt, Elsa Pecourt,  
Peter Poller, Norbert Pflieger and Norbert Reithinger
- 12:00-13:00    *Lunch*
- 13:00-13:30    *Scalable Construction-Based Parsing and Semantic Analysis*  
John Bryant
- 13:30-14:00    *Scaling Understanding up to Mental Spaces*  
Eva Mok, John Bryant and Jerome Feldman
- 14:30-15:00    *Different Sense Granularities for Different Applications*  
Martha Palmer, Olga Babko-Malaya and Hoa Trang Dang
- 15:00-15:30    *Making Relative Sense: From Word-graphs to Semantic Frames*  
Robert Porzel, Berenike Loos and Vanessa Micelli
- 15:30-16:00    *Break*
- 16:00-16:30    *HYPERBUG: A Scalable Natural Language Generation Approach*  
Martin Klärner
- 16:30-17:00    Final Discussion

## Author Index
