Preface by the System Demonstration Co-Chairs

Welcome to the proceedings of the system demonstrations session. This volume contains the papers of the system demonstrations presented at the 2021 Conference on Empirical Methods in Natural Language Processing, which was held on November 7–11, 2021.

The system demonstrations session includes papers describing systems ranging from early research prototypes to mature production-ready software. We received 130 valid submissions, of which 42 were selected for inclusion in the proceedings after review of the program committee, achieving an overall acceptance rate of 32%.

We thank all authors for their submissions, and the 105 members of the program committee for their timely and thoughtful reviews.
