INTRODUCTION

This volume contains the papers accepted for the EACL-03 workshop on Morphological Processing of Slavic Languages held in Budapest on April 13, 2003, just preceding the 11th Conference of the European Chapter of the Association for Computational Linguistics.

The aim of this workshop was to present, in one place, different aspects of the morphological processing of Slavic languages and to establish the current relation between linguistic knowledge and the possibilities of fulfilling the computational needs for Slavic languages. Different approaches to modelling morphological structure, to lexical and corpus annotation and to processing morphological information have been developed, and some of them for more than one language. Yet annotation schemes, morphological analysers, part-of-speech taggers or language resources that encompass all - or even a larger number of - Slavic languages are rare. At the same time, a systematic review of existing approaches to the morphological processing of Slavic languages and their relations does not yet exist.

The topic of the workshop was the morphological computational analysis and annotation of Slavic languages, encountered on both the inflective and the derivational levels. The workshop discussed the lexical structures necessary for morphological analysis and presented standardisation efforts in the field that can, for instance, enable the transfer of applied methods from one language to another, or aid in the annotation of morphological information in corpora. In addition to resources, these papers also discuss methods for word-level syntactic tagging, lexicon acquisition, collocation and term extraction.

From the fifteen papers submitted for this workshop, the reviewers selected the twelve papers included in these proceedings. The papers cover seven Slavic languages - Bulgarian, Czech, Croatian, Polish, Russian, Serbian, and Slovenian - as well as the majority of suggested workshop topics. The organisers and editors would like to thank the reviewers as well as the authors for their work in making the Workshop on Morphological Processing of Slavic Languages a success.

Tomaž Erjavec & Duško Vitas

April 2003

ORGANISERS:

Tomaž Erjavec, Jožef Stefan Institute, Ljubljana
Duško Vitas, University of Belgrade, Belgrade

PROGRAMME COMMITTEE:

František Čermak, Charles University, Czech Republic
Greville G. Corbett, University of Surrey, UK
Tomaž Erjavec, Jožef Stefan Institute, Slovenia
Roger Evans, University of Brighton, UK
Karel Pala, Masaryk University, Czech Republic
Vladimír Petkevič, Charles University, Czech Republic
Vladimir Plungian, Russian Academy of Sciences, Russia
Max Silberztein, Université de Franche-Comté, France
Kiril Simov, Bulgarian Academy of Sciences, Bulgaria
Marko Tadić, University of Zagreb, Croatia
Duško Vitas, University of Belgrade, Serbia & Montenegro

WORKSHOP PROGRAMME

Sunday, April 13

- 8:45-9:00 Welcome
- 09:00-09:30 *Relations between Inflectional and Derivation Patterns*
Karel Pala, Radek Sedláček and Marek Veber
- 09:30-10:00 *A Large-scale Inheritance-based Morphological Lexicon for Russian*
Roger Evans, Carole Tiberius, Dunstan Brown and Greville C. Corbett
- 10:00-10:30 *Automatic Lexical Acquisition from Raw Corpora: An Application to Russian*
Antoni Oliver, Irene Castellón and Lluís Màrquez
- 10:30-11:00 MORNING BREAK
- 11:00-11:30 *The MULTEXT-East Morphosyntactic Specification for Slavic Languages*
Tomaž Erjavec, Cvetana Krstev, Vladimir Petkevič, Kiril Simov,
Marko Tadić and Duško Vitas
- 11:30-12:00 *A Flexemic Tagset for Polish*
Adam Przepiórkowski and Marcin Woliński
- 12:00-12:30 *Building the Croatian Morphological Lexicon*
Marko Tadić and Sanja Fulgosi
- 12:30-14:00 LUNCH
- 14:00-14:30 *Unsupervised Learning of Bulgarian POS Tags*
Derrick Higgins
- 14:30-15:00 *Composite Tense Recognition and Tagging in Serbian*
Duško Vitas and Cvetana Krstev
- 15:00-15:30 *A Reconfigurable Stochastic Tagger for Languages with Complex Tag Structure*
Łukasz Dębowski
- 15:30-16:00 AFTERNOON BREAK
- 16:00-16:30 *Some Aspects of the Morphological Processing of Bulgarian*
Milena Slavcheva
- 16:30-17:00 *Morpho-syntactic Clues for Terminological Processing in Serbian*
Goran Nenadić, Irena Spasić and Sophia Ananiadou
- 17:00-17:30 *Russian Morphology: Ressources and Java Software Application*
Serge Yablonsky
- 17:30-18:30 ROUND TABLE
Slavic Languages: Between Linguistic Description and Computational Needs

Table of Contents

<i>Relations between Inflectional and Derivation Patterns</i> Karel Pala, Radek Sedláček and Marek Veber	1
<i>A Large-scale Inheritance-based Morphological Lexicon for Russian</i> Roger Evans, Carole Tiberius, Dunstan Brown and Greville C. Corbett	9
<i>Automatic Lexical Acquisition from Raw Corpora: An Application to Russian</i> Antoni Oliver, Irene Castellón and Lluís Màrquez	17
<i>The MULTEXT-East Morphosyntactic Specification for Slavic Languages</i> Tomaž Erjavec, Cvetana Krstev, Vladimir Petkevič, Kiril Simov, Marko Tadić and Duško Vitas	25
<i>A Flexemic Tagset for Polish</i> Adam Przepiórkowski and Marcin Woliński	33
<i>Building the Croatian Morphological Lexicon</i> Marko Tadić and Sanja Fulgosi	41
<i>Unsupervised Learning of Bulgarian POS Tags</i> Derrick Higgins	47
<i>Composite Tense Recognition and Tagging in Serbian</i> Duško Vitas and Cvetana Krstev	55
<i>A Reconfigurable Stochastic Tagger for Languages with Complex Tag Structure</i> Łukasz Dębowski	63
<i>Some Aspects of the Morphological Processing of Bulgarian</i> Milena Slavcheva	71
<i>Morpho-syntactic Clues for Terminological Processing in Serbian</i> Goran Nenadić, Irena Spasić and Sophia Ananiadou	79
<i>Russian Morphology: Ressources and Java Software Application</i> Serge Yablonsky	87
