Preface

We are pleased to present the Proceedings of the 13th International Natural Language Generation Conference (INLG 2020). Due to the COVID-19 pandemic, this year the conference was held online, virtually from Dublin City University (DCU) on December 15-18 2020.

INLG 2020 was organised by ADAPT, the world-leading Science Foundation Ireland(SFI) funded Research Centre for Digital Media Technology and the University of Aberdeen. The event took place under the auspices of the Special Interest Group on Natural Language Generation (SIGGEN) of the Association for Computational Linguistics (ACL).

The INLG conference is the main international forum for the discussion of all aspects of Natural Language Generation (NLG), including data-to-text, concept-to-text, text-to-text and vision-to-text approaches. Special topics of interest for the 2020 edition included:

- Generating text in languages beyond English,
- NLG approaches from visual inputs (images, charts and virtual environments), and
- Evaluation of NLG Systems, with papers revisiting evaluation methodologies and human studies, and two Shared Task proposals.

Three international keynote speakers, experts on NLG and Multi-Modal and Multi-Lingual Generation contributed to this year's program:

- Claire Gardent (CNRS / LORIA, France)
- Lucia Specia (Imperial College London / University of Sheffield, UK and ADAPT Centre, DCU, Ireland)
- Michael White (Ohio State University, United States)

In addition to the main conference, a number of workshops were accepted following an open Call for Workshop Proposals:

- 1st Workshop on Discourse Theories for Text Planning
- 2nd Workshop on Interactive Natural Language Technology for Explainable Artificial Intelligence (NL4XAI)
- 2nd Workshop on Natural Language Generation for Human-Robot Interaction (NLG4HRI)
- 1st Workshop on Evaluating NLG Evaluation
- 3rd Workshop on Natural Language Generation from the Semantic Web

The main conference unfolds over two and a half days to accommodate the number of submissions. For the main conference, we received 119 submissions, of which 27 were accepted as long papers, 15 as short papers, 1 as demo paper, and 3 as generation challenge papers. All accepted papers for the main conference are included in these proceedings.

We received financial support from the following sponsors:

- Google
- ARRIA NLG
- Huawei
- ADAPT Centre for Digital Media Technology

We would like to thank all our sponsors for their support, and in particular Abbey Conference Management for their hard work for the smooth transition to deliver INLG 2020 online. Finally would also like to extend our gratitude to all speakers, (area) chairs and reviewers for their excellent work.
