Introduction

Welcome to the first Workshop on Commonsense Inference in Natural Language Processing, COIN.

This workshop takes place for the first time and has a focus on research around modeling commonsense knowledge, developing computational models thereof, and applying commonsense inference methods in NLP tasks. This includes any type of commonsense knowledge representation, and explicitly also work that makes use of knowledge bases and approaches developed to mine or learn commonsense from other sources. Evaluation proposals that explore new ways of evaluating methods of commonsense inference, going beyond established natural language processing tasks are also of interest for the workshop.

The workshop included two shared tasks on English reading comprehension using commonsense knowledge. The first task is a multiple choice reading comprehension task on everyday narrations. The second task is a cloze task on news texts.

Several teams participated in the shared tasks, with 4 teams submitting results for task 1, and one team submitting results for both tasks. All models are based on Transformer architectures. The best performing models reach 90.6% accuracy and 83.7% F1-score on task 1 and task 2, respectively.

In total, we received 22 paper submissions (among them 6 shared task papers), out of which 16 were accepted. All workshop papers are presented as talks, while the shared task papers are presented in a poster session. In addition, the workshop includes two invited talks on the topics of commonsense inference and commonsense in question answering.

The program committee consisted of 21 researchers, who we'd like to thank for providing helpful and constructive reviews on the papers. We'd also like to thank all authors for their submissions and interest in our workshop.

Simon, Sheng, Michael and Peter

Organizers:

Simon Ostermann, Saarland University / Nuance Communications

Sheng Zhang, Johns Hopkins University

Michael Roth, Saarland University / University of Stuttgart

Peter Clark, Allen Institute for AI

Program Committee:

Malihe Alikhani, Rutgers University

Ken Barker, IBM Research

Yonatan Bisk, University of Washington

Nathanael Chambers, United States Naval Academy

Hans Chalupsky, USC Information Sciences Institute

Vera Demberg, Saarland University

Andrew S. Gordon, University of Southern California

Jonathan Gordon, Vassar College

William Jarrold, Nuance Communications

Gerard de Melo, Rutgers University

Elizabeth Merkhofer, MITRE Corporation

Todor Mihaylov, Heidelberg University

Ashutosh Modi, Disney Research

Sreyasi Nag Chowdhury, Max-Planck-Institut for Informatics

Juri Opitz, Heidelberg University

Letitia Elena Parcalabescu, Heidelberg University

Debjit Paul, Heidelberg University

Hannah Rashkin, University of Washington

Simon Razniewski, Max Planck Institute for Informatics

Niket Tandon, Allen Institute for AI

Adam Trischler, Microsoft Research

Invited Speaker:

Yejin Choi, University of Washington / Allen Institute for AI

Michael Witbrock, University of Auckland

Table of Contents

<i>Understanding Commonsense Inference Aptitude of Deep Contextual Representations</i> Jeff Da and Jungo Kasai	1
<i>A Hybrid Neural Network Model for Commonsense Reasoning</i> Pengcheng He, Xiaodong Liu, Weizhu Chen and Jianfeng Gao	13
<i>Towards Generalizable Neuro-Symbolic Systems for Commonsense Question Answering</i> Kaixin Ma, Jonathan Francis, Quanyang Lu, Eric Nyberg and Alessandro Oltramari	22
<i>When Choosing Plausible Alternatives, Clever Hans can be Clever</i> Pride Kavumba, Naoya Inoue, Benjamin Heinzerling, Keshav Singh, Paul Reisert and Kentaro Inui 33	
<i>Commonsense about Human Senses: Labeled Data Collection Processes</i> Ndapa Nakashole	43
<i>Extracting Common Inference Patterns from Semi-Structured Explanations</i> Sebastian Thiem and Peter Jansen	53
<i>Commonsense Inference in Natural Language Processing (COIN) - Shared Task Report</i> Simon Ostermann, Sheng Zhang, Michael Roth and Peter Clark	66
<i>KARNA at COIN Shared Task 1: Bidirectional Encoder Representations from Transformers with relational knowledge for machine comprehension with common sense</i> Yash Jain and Chinmay Singh	75
<i>IIT-KGP at COIN 2019: Using pre-trained Language Models for modeling Machine Comprehension</i> Prakhar Sharma and Sumegh Roychowdhury	80
<i>Jeff Da at COIN - Shared Task</i> Jeff Da	85
<i>Pingan Smart Health and SJTU at COIN - Shared Task: utilizing Pre-trained Language Models and Common-sense Knowledge in Machine Reading Tasks</i> Xiepeng Li, Zhexi Zhang, Wei Zhu, Zheng Li, Yuan Ni, Peng Gao, Junchi Yan and Guotong Xie	93
<i>BLCU-NLP at COIN-Shared Task1: Stagewise Fine-tuning BERT for Commonsense Inference in Everyday Narrations</i> Chunhua Liu and Dong Yu	99
<i>Commonsense inference in human-robot communication</i> Aliaksandr Huminski, Yan Bin Ng, Kenneth Kwok and Francis Bond	104
<i>Diversity-aware Event Prediction based on a Conditional Variational Autoencoder with Reconstruction</i> Hirokazu Kiyomaru, Kazumasa Omura, Yugo Murawaki, Daisuke Kawahara and Sadao Kurohashi 113	
<i>Can a Gorilla Ride a Camel? Learning Semantic Plausibility from Text</i> Ian Porada, Kaheer Suleman and Jackie Chi Kit Cheung	123
<i>How Pre-trained Word Representations Capture Commonsense Physical Comparisons</i> Pranav Goel, Shi Feng and Jordan Boyd-Graber	130

Conference Program

Sunday, November 3, 2019

9:00–10:30 **Morning Session**

9:00–9:10 *Introduction*

9:10–10:10 *Invited talk: Commonsense Intelligence—Cracking the Longstanding Challenge in AI*
Yejin Choi

10:10–10:30 *Understanding Commonsense Inference Aptitude of Deep Contextual Representations*
Jeff Da and Jungo Kasai

10:30–11:00 *Coffee break*

11:00–12:20 **Pre-lunch Session**

11:00–11:20 *A Hybrid Neural Network Model for Commonsense Reasoning*
Pengcheng He, Xiaodong Liu, Weizhu Chen and Jianfeng Gao

11:20–11:40 *Towards Generalizable Neuro-Symbolic Systems for Commonsense Question Answering*
Kaixin Ma, Jonathan Francis, Quanyang Lu, Eric Nyberg and Alessandro Oltramari

11:40–12:00 *When Choosing Plausible Alternatives, Clever Hans can be Clever*
Pride Kavumba, Naoya Inoue, Benjamin Heinzerling, Keshav Singh, Paul Reiser and Kentaro Inui

12:00–12:20 *Commonsense about Human Senses: Labeled Data Collection Processes*
Ndapa Nakashole

12:20–14:00 *Lunch break*

Sunday, November 3, 2019 (continued)

14:00–15:20 Post-lunch Session

14:00–15:00 *Invited talk: Learning to Reason: from Question Answering to Problem Solving*
Michael Witbrock

15:00–15:20 *Extracting Common Inference Patterns from Semi-Structured Explanations*
Sebastian Thiem and Peter Jansen

15:20–16:20 Poster session

15:30–16:00 *(including coffee break)*

15:20–16:20 *Commonsense Inference in Natural Language Processing (COIN) - Shared Task Report*
Simon Ostermann, Sheng Zhang, Michael Roth and Peter Clark

15:20–16:20 *KARNA at COIN Shared Task 1: Bidirectional Encoder Representations from Transformers with relational knowledge for machine comprehension with common sense*
Yash Jain and Chinmay Singh

15:20–16:20 *IIT-KGP at COIN 2019: Using pre-trained Language Models for modeling Machine Comprehension*
Prakhar Sharma and Sumegh Roychowdhury

15:20–16:20 *Jeff Da at COIN - Shared Task*
Jeff Da

15:20–16:20 *Pingan Smart Health and SJTU at COIN - Shared Task: utilizing Pre-trained Language Models and Common-sense Knowledge in Machine Reading Tasks*
Xiepeng Li, Zhexi Zhang, Wei Zhu, Zheng Li, Yuan Ni, Peng Gao, Junchi Yan and Guotong Xie

15:20–16:20 *BLCU-NLP at COIN-Shared Task1: Stagewise Fine-tuning BERT for Commonsense Inference in Everyday Narrations*
Chunhua Liu and Dong Yu

Sunday, November 3, 2019 (continued)

16:20–17:30 Afternoon Session

- 16:20–16:40 *Commonsense inference in human-robot communication*
Aliaksandr Huminski, Yan Bin Ng, Kenneth Kwok and Francis Bond
- 16:40–16:55 *Diversity-aware Event Prediction based on a Conditional Variational Autoencoder with Reconstruction*
Hirokazu Kiyomaru, Kazumasa Omura, Yugo Murawaki, Daisuke Kawahara and Sadao Kurohashi
- 16:55–17:15 *Can a Gorilla Ride a Camel? Learning Semantic Plausibility from Text*
Ian Porada, Kaheer Suleman and Jackie Chi Kit Cheung
- 17:15–17:30 *How Pre-trained Word Representations Capture Commonsense Physical Comparisons*
Pranav Goel, Shi Feng and Jordan Boyd-Graber
