Highly respected for its sustained excellence in quality of scholarship, **Linguistic** *Inquiry* leads the field in research on current topics in linguistic theory. Issue after issue, ***LI*** keeps you informed of new theoretical developments by presenting the latest in international research.

The **Linguistic** *Inquiry Index* is a four-part collection of subjects, languages, authors, and article titles from **Volumes 1-19** of **Linguistic** *Inquiry*. Compiled and reviewed by linguists, designed for the researcher, the ***LI Index*** is an invaluable tool that encompasses all the important concepts of linguistics and allows you to target relevant articles from over 75 issues of **Linguistic** *Inquiry*.

Original in Paperback

THE MINIMALIST PROGRAM

Noam Chomsky

The Minimalist Program consists of four recent essays that attempt to situate linguistic theory in the broader cognitive sciences. Building on the theory of principles and parameters, the minimalist framework takes Universal Grammar as providing a unique computational system, with derivations driven by morphological properties, to which the syntactic variation of languages is also restricted.

Current Studies in Linguistics
300 pp. $20.00 paperback

ENGLISH SYNTAX

Second Edition

C. L. Baker

English Syntax is an authoritative, self-contained introduction to the subject for students who have had no prior coursework in syntactic theory. In this revised edition, there are changes in almost every chapter, including a large number of new exercises and several new subsections.

672 pp., 348 illus. $27.50 paperback

LANGUAGE IN ACTION

Categories, Lambdas, and Dynamic Logic

Johan van Benthem

Language in Action demonstrates the viability of mathematical research into the foundations of categorial grammar. Since its initial publication it has become the classic work in the foundations of categorial grammar. A new introduction to this paperback edition updates the open research problems and records relevant results through pointers to the literature.

360 pp. $30.00 paperback

THE WORD ON LANGUAGE

REPRESENTING TIME IN NATURAL LANGUAGE

The Dynamic Interpretation of Tense and Aspect

Alice G. B. ter Meulen

Alice ter Meulen integrates current research in natural language semantics, with detailed analyses of English discourse, and logical tools from a variety of sources into an information theory that provides the foundation for computational systems to reason about change and the flow of time.

A Bradford Book
176 pp., 23 illus. $22.50

ELECTRIC WORDS

Dictionaries, Computers, and Meanings

Yorick A. Wilks, Brian M. Slator, and Louise Guthrie

Electric Words is the first general survey of and introduction to the entire range of work in lexical linguistics and corpora in the broader fields of natural-language processing and artificial intelligence.

ACL-MIT Press Series in Natural Language Processing. A Bradford Book
288 pp. $32.50

Guidelines for Submissions

Manuscripts for **Computational Linguistics** should be submitted on letter-size paper (8.5 by 11 inches, or A4), double-spaced throughout, including footnotes and references. The paper should begin with an informative abstract of approximately 150–250 words. Manuscripts must be written in English. Contact the editor regarding the possibility of electronic submission.

Submissions may be made in any of the following categories:

Papers: This category includes contributions that report significant new research results in computational linguistics or that provide critical reviews of the literature on a particular topic. The length of a paper depends on its content, but it is suggested that manuscripts be limited to forty double-spaced pages. That is the equivalent of thirty journal pages. Each paper is fully refereed, being read by at least two members of the editorial board and usually by an additional expert in the particular subject area. The submission of an article to CL for refereeing means that the author certifies the manuscript is not copyrighted; nor has it been published or submitted for publication to another refereed journal. If any version of the paper has appeared, or will appear, in a non-refereed publication, the details of such publication must be made known to the Editor at the time of submission. The final version of a paper tentatively accepted for publication must be accompanied by a Copyright Transfer Agreement signed by all of the authors or, in the case of a "work for hire," by the employer. This written transfer is necessary under the 1978 U.S. Copyright law.

Letters to the Editor: This category includes statements of opinion on issues relevant to the readership. The Editor and the editorial board will evaluate the appropriateness of these contributions for inclusion.

Five copies of papers or three copies of letters should be sent to:

Julia Hirschberg, CL Editor
AT&T Bell Laboratories
600 Mountain Avenue, 2C-409
Murray Hill, NJ 07974, USA
(+1 908) 582-7496; acl@research.att.com

Squibs and Discussions: This category includes short articles reporting technical results, discussions of results, algorithms, or new computational linguistic data or tools of interest to the journal readership. Submissions should generally not exceed eight double-spaced pages and should be submitted to:

James Pustejovsky, CL Squibs and Discussions Co-Editor
Brandeis University
Computer Science Department
Waltham, MA 02254, USA
(+1 617) 736-2709; jamesp@cs.brandeis.edu

Book Section: Anyone interested in reviewing a book, or in suggesting a book for review, should contact the Book Review Editor; publishers may also submit copies of books for review directly to:

Graeme Hirst, CL Book Review Editor
University of Toronto
Department of Computer Science
Toronto, CANADA M5S 1A4
(+1 416) 978-8747; gh@cs.toronto.edu

The FINITE STRING: Send (a) summaries of research in progress — of particular interest would be perspectives on the activities at a particular institution; (b) announcements of meetings of potential interest to the membership; and (c) personal notes (e.g., honors, moving, changes in status) to The FINITE STRING Editor. Time-sensitive material should be received by the first day of the second month of each quarter to appear in the next issue. Submissions (where possible in electronic form) should be sent to:

Ralph Weischedel, FINITE STRING Editor
BBN Systems & Technologies
10 Moulton Street
Cambridge, MA 02138, USA
(+1 617) 873–3496; weischedel@bbn.com

Founded in 1962, the Association for Computational Linguistics (ACL) is the primary scientific and professional society for natural language processing research and applications. A European chapter was established in 1982. Besides publishing *Computational Linguistics*, the ACL holds international meetings (annually in North America, biennially in Europe) where the state-of-the-art in natural language processing research and development is presented. Recently, special interest groups on the Mathematics of Language, the Lexicon, Parsing, Generation, Computational Phonology, and Multimedia Language Processing have been formed; others are likely to be added.
