

## **POWER TRANSLATOR**

Tom Knupp  
Globalink, Inc.

### *Product Description*

The Power Translator product line encompasses a full range of keyboarding, translation processing, dictionary update, editing, grammatical reference, and voice output features as well as file format conversion and networking utilities. A series of subject dictionaries in various language pairs has been developed for use in conjunction with Power Translator Professional. Bidirectional translation to and from English is available for French, German, Russian, and Spanish. Monodirectional translation is available for English to Chinese.

Power Translator and Power Translator Professional products have been developed for the DOS, Windows, and OS/2 operating systems, Macintosh computers, and UNIX-based systems. Power Translator has also been ported to a handheld device with speech output via earpiece.

### *Power Translator for DOS (English to Chinese)*
