

EMNLP 2021

**The 8th Workshop on Argument Mining
(ArgMining 2021)**

Proceedings of the Workshop

November 10 - 11, 2021
Online and in Punta Cana, Dominican Republic

Introduction

Argument mining (also known as “argumentation mining”) is a young and gradually maturing research area within computational linguistics. At its heart, argument mining involves the automatic identification of argumentative structures in free text, such as the conclusions, premises, and inference schemes of arguments as well as their interrelations and counter-considerations. To date, researchers have investigated argument mining on genres such as legal documents, product reviews, news articles, online debates, user-generated web discourse, Wikipedia articles, academic literature, persuasive essays, tweets, and dialogues. Recently, also argument quality assessment and generation came into focus. In addition, argument mining is inherently tied to stance and sentiment analysis, since every argument carries a stance towards its topic, often expressed with sentiment.

Argument mining gives rise to various practical applications of great importance. In particular, it provides methods that can find and visualize the main pro and con arguments in a text corpus — or even on in an argument search on the web — towards a topic or query of interest. In instructional contexts, written and diagrammed arguments represent educational data that can be mined for conveying and assessing students’ command of course material. In information retrieval, argument mining is expected to play a salient role in the emerging field of conversational search. And with the IBM Debater Project, technology based on argument mining recently received a lot of media attention.

While solutions to basic tasks such as component segmentation and classification slowly become mature, many tasks remain largely unsolved, particularly in more open genres and topical domains. Success in argument mining requires interdisciplinary approaches informed by NLP technology, theories of semantics, pragmatics and discourse, knowledge of discourse in application domains, artificial intelligence, information retrieval, argumentation theory, and computational models of argumentation.

The community around ArgMining is constantly growing. This year’s edition of the workshop had 39 valid submissions (27 in 2017, 32 in 2018, 41 in 2019, and 30 in 2020). Among the submitted papers, there were 23 full papers, 9 short papers, and 7 shared-task papers. Out of the 39 papers, 11 full papers, 4 short papers, and 6 shared-task papers have been accepted, resulting in an overall acceptance rate of 54%. All the papers are included in the proceedings at hand.

Given the duration of the workshop (1.5 days) and its format (hybrid), we decided to give all the authors the possibility to present their work orally. Long papers were given 15 min for the talk and 5 min for the discussion, while the short papers were given 10 min for the talk and 2 min for discussion. We were delighted to have Professors Anthony Hunter from University College London and Lu Wang from the University of Michigan as keynote speakers. The speakers addressed interesting topics related to persuasion and argument generation.

The ArgMining 2021 workshop program covered the Quantitative Summarization–Key Point Analysis Shared Task, and also featured a best paper award, thankfully sponsored by IBM. Both the shared task and award are announced on the official workshop website chaired by Roxanne El Baff: <https://2021.argmining.org/>.

Khalid Al-Khatib, Yufang Hou, and Manfred Stede
(ArgMining 2021 co-chairs)

Organizers:

Khalid Al-Khatib, Bauhaus-Universität, Weimar (chair)
Yufang Hou, IBM Research Dublin (chair)
Manfred Stede, Universität Potsdam (chair)

Program Committee:

Stergos D. Afantenos, Université Paul Sabatier
Milad Alshomary, Paderborn University
Kevin Ashley, University of Pittsburgh
Roy Bar-Haim, IBM Research AI
Miriam Butt, University of Konstanz
Elena Cabrio, CNRS, Inria, I3S
Shohreh Haddadan, University of Luxembourg
Christopher Hidey, Google
Xinyu Hua, Bloomberg LP
Yohan Jo, Amazon
Christopher Klamm, Technische Universität Darmstadt
Gabriella Lapesa, University of Stuttgart
Anne Lauscher, University of Mannheim
John Lawrence, University of Dundee
Diane Litman, University of Pittsburgh
Elena Musi, Columbia University
Alexis Palmer, University of Colorado
Joonsuk Park, University of Richmond
Simon Parsons, King's College London
Georgios Petasis, NCSR Demokritos
Olesya Razuvayevskaya, European Bioinformatics Institute
Chris Reed, University of Dundee
Patrick Saint-Dizier, IRIT - CNRS
Jodi Schneider, University of Illinois at Urbana Champaign
Benno Stein, Bauhaus-Universität Weimar
Shahbaz Syed, Leipzig University
Nicolas Turenne, UMR LISIS (INRA, UPEM, CNRS)
Serena Villata, CNRS
Henning Wachsmuth, Paderborn University
Vern R. Walker, Maurice A. Hofstra University
Zhongyu Wei, Fudan University
Magdalena Wolska, Bauhaus-Universität Weimar

Invited Speakers:

Anthony Hunter, University College London
Lu Wang, University of Michigan

Table of Contents

Long Papers

<i>Argument Mining on Twitter: A Case Study on the Planned Parenthood Debate</i> Muhammad Mahad Afzal Bhatti, Ahsan Suheer Ahmad and Joonsuk Park	1
<i>Multi-task and Multi-corpora Training Strategies to Enhance Argumentative Sentence Linking Performance</i> Jan Wira Gotama Putra, Simone Teufel and Takenobu Tokunaga	12
<i>Explainable Unsupervised Argument Similarity Rating with Abstract Meaning Representation and Conclusion Generation</i> Juri Opitz, Philipp Heinisch, Philipp Wiesenbach, Philipp Cimiano and Anette Frank	24
<i>Image Retrieval for Arguments Using Stance-Aware Query Expansion</i> Johannes Kiesel, Nico Reichenbach, Benno Stein and Martin Potthast	36
<i>Is Stance Detection Topic-Independent and Cross-topic Generalizable? - A Reproduction Study</i> Myrthe Reuver, Suzan Verberne, Roser Morante and Antske Fokkens	46
<i>Exploring Methodologies for Collecting High-Quality Implicit Reasoning in Arguments</i> Keshav Singh, Farjana Sultana Mim, Naoya Inoue, Shoichi Naito and Kentaro Inui	57
<i>Assessing the Sufficiency of Arguments through Conclusion Generation</i> Timon Gurcke, Milad Alshomary and Henning Wachsmuth	67
<i>M-Arg: Multimodal Argument Mining Dataset for Political Debates with Audio and Transcripts</i> Rafael Mestre, Razvan Milicin, Stuart Middleton, Matt Ryan, Jiatong Zhu and Timothy J. Norman 78	
<i>Citizen Involvement in Urban Planning - How Can Municipalities Be Supported in Evaluating Public Participation Processes for Mobility Transitions?</i> Julia Romberg and Stefan Conrad	89
<i>Argumentation Mining in Scientific Literature for Sustainable Development</i> Aris Fergadis, Dimitris Pappas, Antonia Karamolegkou and Haris Papageorgiou	100
<i>Bayesian Argumentation-Scheme Networks: A Probabilistic Model of Argument Validity Facilitated by Argumentation Schemes</i> Takahiro Kondo, Koki Washio, Katsuhiko Hayashi and Yusuke Miyao	112

Short Papers

<i>Multilingual Counter Narrative Type Classification</i> Yi-Ling Chung, Marco Guerini and Rodrigo Aggerri	125
<i>Predicting Moderation of Deliberative Arguments: Is Argument Quality the Key?</i> Neele Falk, Iman Jundi, Eva Maria Vecchi and Gabriella Lapesa	133
<i>Self-trained Pretrained Language Models for Evidence Detection</i> Mohamed Elaraby and Diane Litman	142

<i>Multi-task Learning in Argument Mining for Persuasive Online Discussions</i> Nhat Tran and Diane Litman.....	148
--	-----

Shared-Task Papers

<i>Overview of the 2021 Key Point Analysis Shared Task</i> Roni Friedman, Lena Dankin, Yufang Hou, Ranit Aharonov, Yoav Katz and Noam Slonim....	154
<i>Matching The Statements: A Simple and Accurate Model for Key Point Analysis</i> Hoang Phan, Long Nguyen, Long Nguyen and Khanh Doan.....	165
<i>Modern Talking in Key Point Analysis: Key Point Matching using Pretrained Encoders</i> Jan Heinrich Reimer, Thi Kim Hanh Luu, Max Henze and Yamen Ajjour.....	175
<i>Key Point Analysis via Contrastive Learning and Extractive Argument Summarization</i> Milad Alshomary, Timon Gurcke, Shahbaz Syed, Philipp Heinisch, Maximilian Spliethöver, Philipp Cimiano, Martin Potthast and Henning Wachsmuth.....	184
<i>Key Point Matching with Transformers</i> Emanuele Cosenza.....	190
<i>Team Enigma at ArgMining-EMNLP 2021: Leveraging Pre-trained Language Models for Key Point Matching</i> Manav Kapadnis, Sohan Patnaik, Siba Panigrahi, Varun Madhavan and Abhilash Nandy.....	200

Workshop Program

November 10, 2021

09:00 – 09:30

Opening Remarks

09:30 – 10:30

Invited Talk 1

10:30 – 11:00

Coffee Break

Session 1

11:00 – 11:20

Argument Mining on Twitter: A Case Study on the Planned Parenthood Debate

Muhammad Mahad Afzal Bhatti, Ahsan Suheer Ahmad and Joonsuk Park

11:20 – 11:40

Multi-task and Multi-corpora Training Strategies to Enhance Argumentative Sentence Linking Performance

Jan Wira Gotama Putra, Simone Teufel and Takenobu Tokunaga

11:40 – 12:00

Explainable Unsupervised Argument Similarity Rating with Abstract Meaning Representation and Conclusion Generation

Juri Opitz, Philipp Heinisch, Philipp Wiesenbach, Philipp Cimiano and Anette Frank

12:00 – 13:00

Lunch Break

Session 2

13:00 – 13:20

Knowledge-Enhanced Evidence Retrieval for Counterargument Generation

Yohan Jo, Haneul Yoo, JinYeong Bak, Alice Oh, Chris Reed and Eduard Hovy

13:20 – 13:40

On Classifying whether Two Texts are on the Same Side of an Argument

Erik Körner, Gregor Wiedemann, Ahmad Hakimi, Gerhard Heyer and Martin Potthast

13:40 – 13:52

Multilingual Counter Narrative Type Classification

Yi-Ling Chung, Marco Guerini and Rodrigo Agerri

13:52 – 13:64

Predicting Moderation of Deliberative Arguments: Is Argument Quality the Key?

Neele Falk, Iman Jundi, Eva Maria Vecchi and Gabriella Lapesa

14:04 – 14:16

Self-trained Pretrained Language Models for Evidence Detection

Mohamed Elaraby and Diane Litman

14:16 – 14:28

Multi-task Learning in Argument Mining for Persuasive Online Discussions

Nhat Tran and Diane Litman

14:30 – 14:45

Coffee Break

14:45 – 16:15

Panel Talks and Discussion

16:15 – 16:45

Coffee Break

November 10, 2021 (continued)

Session 3

- 16:45 – 17:05 *Image Retrieval for Arguments Using Stance-Aware Query Expansion*
Johannes Kiesel, Nico Reichenbach, Benno Stein and Martin Potthast
- 17:05 – 17:25 *Is Stance Detection Topic-Independent and Cross-topic Generalizable? - A Reproduction Study*
Myrthe Reuver, Suzan Verberne, Roser Morante and Antske Fokkens
- 17:25 – 17:45 *Exploring Methodologies for Collecting High-Quality Implicit Reasoning in Arguments*
Keshav Singh, Farjana Sultana Mim, Naoya Inoue, Shoichi Naito and Kentaro Inui

November 11, 2021

09:00 – 10:00 **Invited Talk 2**

Session 4

- 10:00 – 10:20 *Assessing the Sufficiency of Arguments through Conclusion Generation*
Timon Gurcke, Milad Alshomary and Henning Wachsmuth
- 10:20 – 10:40 *M-Arg: Multimodal Argument Mining Dataset for Political Debates with Audio and Transcripts*
Rafael Mestre, Razvan Milicin, Stuart Middleton, Matt Ryan, Jiatong Zhu and Timothy J. Norman

10:40 – 11:00 *Coffee Break*

Session 5

- 11:00 – 11:20 *Citizen Involvement in Urban Planning - How Can Municipalities Be Supported in Evaluating Public Participation Processes for Mobility Transitions?*
Julia Romberg and Stefan Conrad
- 11:20 – 11:40 *Argumentation Mining in Scientific Literature for Sustainable Development*
Aris Fergadis, Dimitris Pappas, Antonia Karamolegkou and Haris Papageorgiou
- 11:40 – 12:00 *Bayesian Argumentation-Scheme Networks: A Probabilistic Model of Argument Validity Facilitated by Argumentation Schemes*
Takahiro Kondo, Koki Washio, Katsuhiko Hayashi and Yusuke Miyao

12:00 – 13:00 *Lunch Break*

13:00 – 14:30 *Shared Task Presentation*

14:30 – 14:45 *Break*

14:45 – 15:00 *Concluding Remarks*
