CAMBRIDGE COMPUTATIONAL LINGUISTICS

Computational Phonology

A Constraint-Based Approach

Steven Bird

"We...recommend this book to anyone interested in computational phonology."

—Computational Linguistics

Computational phonology is one of the newest areas of computational linguistics, and is experiencing rapid growth as its practitioners apply the wealth of theories, technologies and methodologies of computational linguistics to phonology. This book is the first to survey these developments, and it does so in a way that is accessible to computational linguists, phonologists and computer scientists alike.

Studies in Natural Language Processing

47496-5 Hardback $47.95

Linguistics and Computation

Jennifer S. Cole, Georgia M. Green, and Jerry L. Morgan, Editors

This volume consists of a collection of papers that cover the diverse areas of psycholinguistics, computational linguistics, phonology, and syntax.

Contributors: *Steven Abney, Robert C. Berwick, Sandiway Fong, Jennifer Cole, John Coleman, Alan M. Frisch, Dale Gerdemann, Erhard Hinrich, Julia Hirschberg, Richard Sproat, David E. Johnson, Lawrence S. Moss, Tsuneko Nakazawa, Annie Zaenan, Ronald M. Kaplan*

Distributed for CSLI Publications

1-881526-82-8 Hardback $49.95
1-881526-81-X Paperback $22.95

Practical Guide to Syntactic Analysis

Georgia Green and Jerry Morgan

This book is a brief account of the so-called "standard" theory, and of how the current frameworks for syntactic description have evolved to differ from it. The volume also provides a context for understanding both older and current issues in linguistic literature.

CSLI Lecture Notes

Distributed for CSLI Publications

1-57586-017-1 Hardback $49.95
1-57586-016-3 Paperback $22.95

Quantifiers, Deduction, and Context

Makoto Kanazawa, Christopher Piñón, and Henriette de Swart, Editors

The contributors to this volume discuss the current state of the art at the borderline of logic, linguistics and computer science.

Contributors: *Mary Dalrymple, John Lamping, Fernando Pereira, Vijay Saraswat, Jan van Eijck, Kees van Deemter, Megumi Kameyama, Cleo Condoravdi, Mark Gawron, Friederike Moltmann, Henriette de Swart*

Logic and Representation

Robert C. Moore

"...[a] sharp-witted presentation...Moore manages to delight the reader despite the complex and controversial issues of artificial intelligence...Moore's own ideas, as well as his discussion of those by other researchers, are all immensely rewarding because of his crisp and unpretentious presentation."

—Computing Reviews

Literary & Linguistic Computing is an international journal which publishes material on all aspects of computing and information technology applied to literature and language research and teaching. Papers include results of research projects, description and evaluation of techniques and methodologies, and reports of work in progress.

Topics covered include:

- electronic text resources
- text encoding
- hardware and software
- literary applications
- linguistic research
- lexical databases
- teaching computing techniques

Recent & forthcoming articles include:

Text Processing Using Multilingual Resources at the Computing Research Laboratory
J. COWIE, T. DUNNING, L. GUTHRIE, and Y. WILKS

Segmenting Narrative Text into Coherent Scenes
H. KOZIMA and T. FURUGORI

Recent Research in France: a Report and Bibliography
M. JUILLARD

Towards a Corpus of Spoken Modern Greek
D. GOUTSOS, O. HATZIDAKI, and P. KING

Automated Text Analysis: Cautionary Tales
C. N. BALL

Spoken Corpus Transaction
S. CROWDY

The COFREL Project: Compiling an Old French Dictionary
F. LANGLEY

The Federalist Revisited: New Directions in Authorship Attribution
D. I. HOLMES and R. S. FORSYTH

A PC-KIMMO-Based Morphological Description of Modern Greek
K. SGARBAS, N. FAKOTAKIS, and G. KOKKINAKIS

Hypertextual Representation of Literary Working Papers
D. FERRER

The World of Woman in the Bank of English
J. NAKAMURA and J. SINCLAIR

OXFORD JOURNALS

JOOST SCHILPEROORD

It's about time
Temporal aspects of cognitive processes in text production

Amsterdam/Atlanta, GA 1996. 354 pp.
(Utrecht Studies in Language and Communication 6)
ISBN: 90-5183-947-2 Hfl. 100,-/US-$ 67.-

A central issue of cognitive studies of text production is "What goes on in people's minds when they produce a text?", "How do they plan the text?", "How do they decide in what order to express their thoughts?" In this volume, writers are followed in their footsteps during the moment-to-moment process of producing routine business letters. Their writing processes are explored in *real time* with the ultimate goal to contribute to a cognitive theory of text production. Such a theory should tell what kind of mental structures underly text production, how these structures are converted into coherent texts, and how this process is framed within real writing time.

The study starts from a large corpus of real-life text production processes. It combines methods to explore both process and product of text production. Processes are described by analyzing the pause patterns that emerge in the course of writing. Products are described by analyzing their hierarchical structure. Together, these descriptions yield several significant insights in the real time organization of cognitive processes in production.

The study can be characterized as a cognitive linguistic approach to text production. This volume will be of special interest to researchers in the field of (psycho-)-linguistics, textlinguistics and cognitive science.

COMPUTATIONAL INTELLIGENCE

Edited by NICK CERCONE & GORDON McCALLA

University of Regina and University of Saskatchewan

COMPUTATIONAL INTELLIGENCE is a leading international journal designed to promote and stimulate research in the field of artificial intelligence (AI). Articles cover a wide range of AI issues—from the tools and languages of AI to its philosophical implications. Appealing to readers in research and industry, **COMPUTATIONAL INTELLIGENCE** provides a forum for both experimental and theoretical research, surveys and impact studies ■

PRAGMATICS & COGNITION

Edited by Marcelo Dascal *(Tel Aviv University)*

Editorial Board: Jens Allwood *(Linguistics, University of Gothenburg)*, Benny Shanon *(Psychology, Hebrew University of Jerusalem)*, Stephen Stich *(Cognitive Science, Rutgers University)*, Yorick Wilks *(Computer Science, University of Sheffield)*

Pragmatics & Cognition is an interdisciplinary journal that focuses on the *interrelations* between mental activity and the use of semiotic (incl. linguistic) systems by human, animals or machines. Its scope covers a wide variety of semiotic systems as related to a broad range of forms of mental life:

- natural language
- computer languages
- writing
- gesture
- facial expression
- ritual
- pictorial representation
- pattern recognition
- emotion, fantasy, dreaming
- conceptualization
- understanding
- creativity, humor
- problem solving
- mental modeling

Pragmatics & Cognition seeks to explore relations of all sorts between the former and latter: logical and causal dependence; conditions of acquisition, development or loss; modeling, simulation and formalization; biological and neurological basis; social and cultural variation; aesthetic expression; historical development; etc.

Special issue: On Language and Consciousness, No: 4.1 (1996)
A unique issue investigating the interrelationships of
language → consciousness and consciousness → language.
Ray Jackendoff: How language helps us think
Wallace Chafe: How consciousness shapes language
Discussion articles by: Jens Allwood, John Barnden, Andrew Brook, Andy Clark, Hannele Dufva and Mika Lähteenmäki, Ralph D. Ellis, Bert Peeters, and Jan Nuyts
Responses by: Wallace Chafe and Ray Jackendoff Price Hfl. 60,--
Subscr. price: Vol. 4, 1996 ISSN 0929-0907: Hfl. 225,--

Association for Computational Linguistics
1996 MEMBERSHIP, CHANGE OF ADDRESS AND EMAIL, AND ORDER FORM

MEMBERSHIP

Membership in the Association for Computational Linguistics is for the calendar year, regardless of when dues are paid. Membership includes a full year of the ACL journal, *Computational Linguistics*, reduced registration at most ACL-sponsored conferences, and discounts on ACL-sponsored publications. Payments for membership dues, fund donations, back issues, and proceedings may be made in Europe, Japan or the USA. Follow the instructions under the PAYMENT heading carefully.
Provide all personal information, even if you have previously done so, to be sure the ACL membership database is up-to-date. Write legibly, please!

FULL NAME_____
(first) (last/family)
ADDRESS_____

_____

_____

_____

INSTITUTION_____ **TELEPHONE**_____
(if not in address above)
E-MAIL ADDRESS_____ **FAX**_____
Please IMMEDIATELY notify the ACL Office of address and email changes. Journal copies returned due to bad addresses will not be remailed until a $5.00 postage/handling fee is remitted. Email (if available) is used to distribute meeting, membership, and other announcements.

MEMBERSHIP DUES FOR 1996

IMPORTANT NOTE: Renewals must be received no later than 1 April 1996 to avoid late payment fee assessment. Membership categories include Regular Members and the following: Couples with the same mailing address may be Joint Members; they will receive only one set of publications, but each will be eligible for all other member benefits. Students taking a full-time program of courses and not earning a regular income may become Student Members WITH COPY OF CURRENT STUDENT ID. Students who are not Student Members because of their income can still participate in student activites as Student-Employed. Also available are Retired and Unemployed memberships. Late payment fees do not apply to new memberships.

❑ Regular($50) ❑ Joint($60) ❑ Student($30) ❑ Student-Employed($50) ❑ Retired($30) ❑ Unemployed($30)
MEMBERSHIP DUES $_____

1st Class or Air journal mailing ($10 US, Canada, Mexico;$25 elsewhere): **OPTIONAL JOURNAL MAILING $**_____
RENEWALS received after 1 April 1996 pay *additional* $10 postage/handling fee **LATE PAYMENT FEE $**_____

INTERNATIONAL FUND: Allows ACL memberships and publications to be available to colleagues who have difficulty in using their national currencies for international transactions or for whom membership would otherwise be impossible. Contributions may be tax deductible; check local regulations. Receipts are available upon request. **INTERNATIONAL FUND $**_____

THE DON AND BETTY WALKER INTERNATIONAL STUDENT FUND: This fund was set up to honor Don and Betty Walker. It supports select student travel to ACL meetings. Contributions may be tax deductible, and companies may provide matching funds; check local regulations. Receipts are available upon request. Make checks payable to "THE WALKER FUND". Visa and Mastercard payments are also accepted.
WALKER FUND $_____

TOTAL PAYMENT FOR MEMBERSHIP, WALKER AND INTERNATIONAL FUNDS $_____
(list in PAYMENT SECTION)

PAYMENT

METHOD OF PAYMENT (circle): CHECK MONEY ORDER CREDIT CARD BANK TRANSFER

CREDIT CARD INFORMATION (VISA OR MASTERCARD ONLY):

CARD NUMBER_____ EXPIRATION DATE_____

CARDHOLDER'S NAME (as appears on card)_____

GRAND TOTAL OF PAYMENT AUTHORIZED OR ENCLOSED $_____
(total from MEMBERSHIP and total from PUBLICATION SECTIONS)

PREPAYMENT is necessary; invoices and receipts are available upon request. The U.S. dollar price is definitive when paying in other currencies, although rounding off is appropriate. CHECKS AND MONEY ORDERS SHOULD BE PAYABLE TO THE ASSOCIATION FOR COMPUTATIONAL LINGUISTICS (or to ACL). Payment may be made by sending this form (or all pertinent details) and credit card information in email to acl@bellcore.com. The following payment choices are available:

1. **CREDIT CARDS**: Credit card payments MUST BE MADE TO THE ACL OFFICE IN THE USA. Visa and Mastercard only. Email or hardcopy is acceptable.
2. **CHECKS/MONEY ORDERS: TO THE ACL OFFICE IN THE USA:** Send this dues statement in hardcopy with a check or money order to the address below. PAYMENTS MUST BE IN U.S. DOLLARS. DRAWN ON A U.S. BANK OR IN U.S. OR CANADIAN DOLLARS (CALCULATED AT THE CURRENT EXCHANGE RATE). DRAWN ON A CANADIAN BANK.
3. **PAYMENTS TO EUROPE:** Mail to Rosner this form and a check or money order in Swiss francs or the equivalent in your local currency (calculated at the current exchange rate), payable to the ACL. The check or money order must be payable in Switzerland or France. Payment can also be made by bank transfer to ACL account number 141.880.LAV at the Union Bank of Switzerland, 8 Rue du Rhone, CH-1211 Geneva 11, SWITZERLAND. Send Rosner a copy of the bank transfer and the dues statement. NOTE THAT EUROPEAN MEMBERS SHOULD PAY THROUGH ROSNER UNLESS THEY PAY BY CREDIT CARD OR HAVE A U.S. BANK ACCOUNT.
4. **PAYMENTS TO JAPAN**: Transfer an equivalent amount (on the day of payment) in yen to "Dia-ichi Kangyo Bank, Hyakumanben Branch; Ordinary Deposit, 476-1319944; Name: Keisangengogakkai Kaihi Nagao Makoto". Send Nagao a copy of the bank transfer. SEND THE DUES STATEMENT AND COPY OF BANK TRANSFER TO THE ACL OFFICE FOR MEMBERSHIP TO BE PROPERLY RECORDED.

[November 1995, Kathleen McKeown, ACL Secretary/Treasurer]

Guidelines for Submissions

Manuscripts for **Computational Linguistics** should be submitted on letter-size paper (8.5 by 11 inches, or A4), double-spaced throughout, including footnotes and references. The paper should begin with an informative abstract of approximately 150–250 words. Manuscripts must be written in English. Contact the editor regarding the possibility of electronic submission.

Submissions may be made in any of the following categories:

Papers: This category includes contributions that report significant new research results in computational linguistics or that provide critical reviews of the literature on a particular topic. The length of a paper depends on its content, but it is suggested that manuscripts be limited to forty double-spaced pages. That is the equivalent of thirty journal pages. Each paper is fully refereed, being read by at least two members of the editorial board and usually by an additional expert in the particular subject area. The submission of an article to CL for refereeing means that the author certifies the manuscript is not copyrighted; nor has it been published or submitted for publication to another refereed journal. If any version of the paper has appeared, or will appear, in a non-refereed publication, the details of such publication must be made known to the Editor at the time of submission. The final version of a paper tentatively accepted for publication must be accompanied by a Copyright Transfer Agreement signed by all of the authors or, in the case of a "work for hire," by the employer. This written transfer is necessary under the 1978 U.S. Copyright law.

Letters to the Editor: This category includes statements of opinion on issues relevant to the readership. The Editor and the editorial board will evaluate the appropriateness of these contributions for inclusion.

Five copies of papers or three copies of letters should be sent to:

Julia Hirschberg, CL Editor
AT&T Research
600 Mountain Avenue, 2C-409
Murray Hill, NJ 07974, USA
(+1 908) 582-7496; acl@research.att.com

Squibs and Discussions: This category includes short articles reporting technical results, discussions of results, algorithms, or new computational linguistic data or tools of interest to the journal readership. Submissions should generally not exceed eight double-spaced pages and should be submitted to:

Pierre Isabelle, CL Squibs and Discussions Editor
CWARC Communications Canada
1575 Chomedey Boulevard
Laval, Quebec, CANADA H7V 2X2
(+1 514) 973-5801; isabelle@citi.doc.ca

Book Section: Anyone interested in reviewing a book, or in suggesting a book for review, should contact the Book Review Editor; publishers may also submit copies of books for review directly to:

Graeme Hirst, CL Book Review Editor
University of Toronto
Department of Computer Science
Toronto, CANADA M5S 3G4
(+1 416) 978-8747; gh@cs.toronto.edu

The FINITE STRING: Send (a) summaries of research in progress — of particular interest would be perspectives on the activities at a particular institution; (b) announcements of meetings of potential interest to the membership; and (c) personal notes (e.g., honors, moving, changes in status) to The FINITE STRING Editor. Time-sensitive material should be received by the first day of the second month of each quarter to appear in the next issue. Submissions (where possible in electronic form) should be sent to:

Richard Sproat, FINITE STRING Editor
Bell Laboratories
600 Mountain Avenue, 2D-451
Murray Hill, NJ 07974, USA
(+1 908) 582-5296; rws@bell-labs.com

Founded in 1962, the Association for Computational Linguistics (ACL) is the primary scientific and professional society for natural language processing research and applications. A European chapter was established in 1982. Besides publishing *Computational Linguistics*, the ACL holds international meetings (annually in North America, biennially in Europe) where the state-of-the-art in natural language processing research and development is presented. Recently, special interest groups on the Mathematics of Language, the Lexicon, Parsing, Generation, Computational Phonology, and Multimedia Language Processing have been formed; others are likely to be added.
