NICT at WAT 2015

Chenchen Ding, Masao Utiyama, Eiichiro Sumita

Multilingual Translation Laboratory, NICT

What do we want to do

To test several extremely simple techniques
- which, are reported to be efficient in previous researches
- and, WAT offers valuable human evaluation

... if they work, they should be used more widely

As a result

They do work
- *reverse pre-reordering* for Japanese-to-English translation
- *character-based* Korean-to-Japanese translation

Come to our poster
